

# Italian energy storage electricity price policy

Does Italy need electricity storage?

As Italy's energy mix is increasingly composed of variable renewable energy sources, electricity storage will be needed to integrate power generated by renewables into the national grid and make it available when sun and wind energy are not accessible.

Will Italy reach 72 GWh energy storage capacity by 2030?

New Aurora Energy Research report details Italy's path to 72 GWh energy storage capacity by 2030. ROME, ITALY (AURORA ENERGY RESEARCH)-- A new report published by Aurora Energy Research, the global provider of energy market analysis, examines the auction system of the Italian Energy Storage Capacity Procurement Mechanism (MACSE).

How will Italy invest in electricity storage?

Italy will promote investments in utility scale electricity storage to reach at least 70 GWh, and worth over Euro 17 bn, in the next ten years. The new storage capacity will be acquired through tenders published by Terna, the manager of Italy's high voltage grid. The next tender will be released in 2024.

Are battery energy storage systems needed in Italy?

Therefore, battery energy storage systems (BESS) are needed in Italy. The Italian market for BESS is growing rapidly and currently amounts to 2.3 GW but it almost exclusively consists of residential scale systems, associated with small scale solar plants, having a capacity of less than 20 kWh.

Why is energy storage important in Italy?

In addition, electricity storage is critical to avoid congestion in the power grids since most of the renewable production originates in Southern Italy but is consumed mostly in the north. Therefore, PNIEC also provides for the installation of new energy storage infrastructure with the aim of reaching 22.5 GW of installed storage capacity by 2030.

How much will Italy's energy storage program cost in 2023?

In December 2023, the EU greenlit Italy's energy storage program, earmarking a hefty investment of EUR 17.7 billion. This initiative is anticipated to facilitate the construction of over 9 GW/71 GWh of energy storage systems (ESS).

Customer-sited storage adoption has been mainly driven by a combination of high electricity prices and generous tax incentives. For utility-scale systems, Italy has established ...

Energy mix - 2021 Electricity mix - 2021 2. Energy security ... Underground gas storage levels - evolution(e) ITALY Energy Snapshot Source: DG ENER and Eurostat Source: DG ENER and ... Italy s s s Source: Platts analysis for wholesale electricity/gas prices, Eurostat for retail electricity/gas prices 0 100 200 300 400 500

Substantial government incentives, totalling EUR17.7 billion for energy storage and EUR5.7 billion for renewable energy communities, underscore Italy's strong commitment to the ...

This process supports energy policy development and encourages the exchange of international best practices and experiences. Since the last review in 2016, Italy has raised its climate ambitions by aiming for carbon ...

New Aurora Energy Research report details Italy's path to 72 GWh energy storage capacity by 2030. ROME, ITALY (AURORA ENERGY RESEARCH)--A new report published by Aurora Energy Research, the global ...

In addition to being cost-effective, solar thermal energy is also price-predictable, preventing the risks associated with price volatility. The technology is readily deployable and is not constrained by factors such as ...

The Italian Regulatory Authority for Energy, Networks and Environment (ARERA) in resolution no. 574/2014/R/eel define "storage system" as a set of devices and equipment, whose function is to absorb and release ...

Climate change is a worldwide issue which is causing several difficulties and consequences both at human and environmental level. In 2021, the electricity sector emitted more than one third of global energy-related CO<sub>2</sub> emissions [1] recent years, energy policies are aimed to limit the global warming, promoting a green transition toward a low-carbon electricity ...

Italy's Anie said the boost for small-scale energy storage systems provided by the country's renovation "superbonus" is over. The tax credit, which initially offered a 110% rebate for the cost of qualifying energy efficiency ...

Timera Energy look at implementation of a new long term contract support mechanism for storage in Italy that is set to drive a surge in battery investment. ... (e.g. 12-14 year duration). Storage developers will bid for fixed ...

The development of Battery Energy Storage Systems (hereinafter "BESS") in Italy has been limited by the fact that the spread of renewable sources is not such as to produce significant price ...

With the first auctions for procuring new storage capacity in Italy expected in the second quarter of 2025, Aurora Energy Research has analyzed the internal rate of return for projects supported by the Energy Storage ...

The European Union (EU) Commission has approved a state aid scheme aiming to fund the rollout of over 9GW/71GWh of energy storage in Italy. The scheme totalling EUR17.7 billion (US\$19.5 billion) will provide annual ...

Overseas media news on December 5, Italy's Minister of Enterprise and Manufacturing Adolfo Urso signed a new decree that will provide 320 million euros in energy subsidies to support small and medium-sized enterprises (SMEs) to invest on their own in the development and utilization of renewable energy sources, with the aim of increasing the self ...

In 2024, Italy's energy storage market saw remarkable progress, with a 24.6% rise in the number of storage systems and a 30.4% increase in total rated power, reflecting the growth of larger, more efficient installations. To maintain grid ...

Italy will promote investments in utility scale electricity storage to reach at least 70 GWh, and worth over Euro 17 bn, in the next ten years. The new storage capacity will be ...

Revise the National Energy and Climate Plan, in line with the European Union timetable, to strengthen energy security, including by defining a plan that would enable Italy to end any reliance on Russian fossil fuels, while ...

It recognises the pivotal role of BESS and Pumped Hydro Storage (PHS) in Italy's energy future given what is set to be a very high penetration of intermittent solar capacity. While there is broad enthusiasm for MACSE and ...

Policy changes in Italy are expected to have a significant impact on the European energy storage market, potentially leading to changes in local energy storage installations in 2024. Firstly, the decline in subsidies under the ...

Energy prices : Services SIMULTRADE: company registration data : PEC: gme@pec.mercatoelettrico : VAT and Taxpayer's Code ...

Matteo Coriglioni, head of Aurora Energy Research Italy, said official data showed that as of the end of March, Italy had approved more than 2GW of energy storage projects, with another 8GW in the approval process. Aurora Energy Research has a very broad pipeline of energy storage capacity, which is four times what has been approved.

battery storage projects in Italy. He says the recognition that storage is needed to integrate Italy's big renewables pipeline has combined with a capital market which is now more comfortable with and willing to

# Italian energy storage electricity price policy

invest in energy storage. "In Italy, through our JV with Iberdrola we have an indicative target of 1GW for 6 hours (duration).

The energy storage market in Italy doubled in capacity in the first half of the year, though Q2 saw the first slowdown in nine quarters and that could be repeated in H2, according to the country's renewable energy trade body. ...

In December 2023, the European Union approved Italy's EUR17.7 billion energy storage plan to assist the country in building more than 9GW/71GWh of energy storage facilities. The plan, which will run until the end ...

The MACSE auction will provide 15-year contracts for energy storage projects whereby they will be paid annual premiums to cover operating costs in exchange for making their capacity available on the Dispatching ...

Italy has set its objectives in the energy national plan (PNIEC) pushing to a high integration of the renewable power generation (55% of renewable share in the electric sector by 2030).. In the generation mix, an increment of renewable installed capacity by 2030 of around 40 GW with respect to today is expected, mainly consisting of wind and photovoltaic plants, in parallel with ...

Many recent energy policies and incentives have increasingly encompassed energy storage technologies. For instance, the US introduced a 30 % federal tax credit for residential battery energy storage for installations from 2023 to 2034 [4].Recognizing the crucial role of batteries in future energy systems, the European Commission committed to establishing a ...

The government continues to reform authorization and approval processes to accelerate energy projects - a necessary step for Italy to achieve regional energy goals. The Italian and U.S. governments' energy policies are aligned, recognizing the importance of natural gas for energy security and, at the same time, fostering a transition to ...

Monitor cost pressures and identify early signs of production shifts. ... -Market actors predict growth in the Italian energy storage sector will be driven by the system balancing needs of the grid operator in the face of increasing renewable penetration and conventional plant closures. ... market, which has turned into the most mature ...

On December 9, 2023 the Italian Government approved Law Decree No. 181/2023 (the "Energy Decree"), which was converted with amendments into Law No. 11 of February 2, 2024. The purpose of the Energy ...

ROME, ITALY (AURORA ENERGY RESEARCH)--A new report published by Aurora Energy Research, the global provider of energy market analysis, examines the auction system of the Italian Energy Storage

Capacity ...

Analyses conducted by the National Manager of the Grid - Terna show that, by 2030, it will be necessary to develop in Italy about 71 GWh of utility-scale storage capacity, in ...
