

Will Italy support a centralised electricity storage system?

The European Commission has approved, under EU State aid rules a EUR17.7 billion Italian scheme to support the construction and operation of a centralised electricity storage system.

Will Italy get a state aid scheme for energy storage?

The European Union Commission has approved a state aid scheme aiming to fund the rollout of over 9GW/71GWh of energy storage in Italy.

Does Italy need 9gw/71gwh of energy storage?

Italy's TSO Terna says it needs 9GW/71GWh of energy storage by integrate its renewables pipeline. Image: Terna. The European Union (EU) Commission has approved a state aid scheme aiming to fund the rollout of over 9GW/71GWh of energy storage in Italy.

How much does EU Commission approve for a centralised electricity storage system?

EU Commission approves EUR17.7 billion Italian scheme to ... EU Commission approves EUR17.7 billion Italian scheme to support development of centralised electricity storage system.

Will Italy deploy 71 GWh of energy storage in 2033?

Sphera Energy applauds the announcement on the 21st December of the approval by the EU Commission for the upcoming state support and auctions mechanism (managed by TSO Terna) for the deployment of 71 GWh of utility scale Energy Storage in Italy between now and 2033.

Does Italy need electricity storage?

As Italy's energy mix is increasingly composed of variable renewable energy sources, electricity storage will be needed to integrate power generated by renewables into the national grid and make it available when sun and wind energy are not accessible.

Sphera Energy applauds the announcement on the 21st of December of the approval by the EU Commission for the upcoming state support and auctions mechanism (managed by TSO Terna) for the deployment of 71 GWh of utility-scale Energy Storage in Italy between now and 2033. This decision comes a little ahead than expected and confirms

The scheme will be open to all technologies meeting the performance requirements set by the Italian Transmission System Operator ("TSO") and approved by the Italian Energy Regulator. The list of eligible electricity storage ...

The European Commission endorses Italy's EUR17.7 billion initiative for a centralized electricity storage system, supporting renewable integration and the EU's Green Deal. This ...

Italy will promote investments in utility scale electricity storage to reach at least 70 GWh, and worth over Euro 17 bn, in the next ten years. The new storage capacity will be ...

Transmission system operator (TSO) Terna estimates Italy will need 9GW/71GWh of new energy storage to integrate its growing renewables pipeline, an average duration of just under 8 hours. That duration will be split ...

Minister of the environment and energy security Gilberto Pichetto has signed a decree allowing Italy to proceed with its energy storage capacity auction, known as MACSE, in the first half of 2025. ... "The approval of the ...

The European Union (EU) Commission has approved a state aid scheme aiming to fund the rollout of over 9GW/71GWh of energy storage in Italy. The scheme totalling EUR17.7 billion (US\$19.5 billion) will provide annual ...

The UK is a step closer to energy independence as the government launches a new scheme to help build energy storage infrastructure. This could see the first significant long duration energy ...

Does Italy need 9gw/71gwh of energy storage? Italy's TSO Terna says it needs 9GW/71GWh of energy storage by integrate its renewables pipeline. Image: Terna. The European Union (EU) Commission has approved a state aid scheme aiming to fund the rollout of over 9GW/71GWh of energy storage in Italy. Is there a real energy transition in Italy?

Italy, Germany, Spain, France and Ireland expected to be the leading EU countries for storage deployment between now and 2031; Tamarindo's Energy Storage Report brings you a country-by-country run ...

The European Commission, in accordance with EU State aid regulations, has given its approval to a EUR17.7bn Italian initiative aimed at facilitating the establishment and functioning of a centralised electricity ...

The panel discussion on Day 1 of the Energy Storage Summit EU in London last week. Image: Solar Media. Italy's grid-scale energy storage market opportunities are unlike anywhere else, but many challenges and uncertainties ...

Subscribe to Newsletter Energy-Storage.news meets the Long Duration Energy Storage Council Editor Andy Colthorpe speaks with Long Duration Energy Storage Council director of markets and technology Gabriel ...

Minister of the environment and energy security Gilberto Pichetto has signed a decree allowing Italy to proceed with its energy storage capacity auction, known as MACSE, in the first half of 2025.

Speaking to a packed audience hall, executives from technology providers Energy Dome, Energy Vault and NHOA Energy and developers Sphera Energy and Renera Energy discussed one of Europe's most exciting ...

Pacific Green acquiring a majority shareholding in five battery energy parks in Italy from originator Sphera Energy. EUR17.7bn in Italian storage funding approved under state aid rules. Italy is a country that has decided to ...

Italian renewable energy developer GreenGo has received authorisation for two new battery energy storage system (BESS) projects, adding 80 MW of planned capacity in Southern Italy, the company said on Tuesday. ... GreenGo secures approval for 80 MW of BESS projects in Italy. Mar 12, 2025, 11:40:18 AM Article by Sladjana Djunisc.

Europe's grid-scale battery storage market is evolving at lightning speed. Join Conexio-PSE and pv magazine on July 16 in Frankfurt (Main) to discuss key challenges for project developers and capital providers in a ...

The Birth of a Super Plan. The European Commission announced last Thursday the approval of Italy's EUR17.7 billion plan to aid the construction of energy storage facilities exceeding 9 GW/71 GWh. This plan, slated to continue until the end of 2033, will provide annual payments to electricity storage developers to cover investment and operational costs.

To develop utility-scale electricity storage facilities, the Italian Government set up a scheme that was approved by the European Commission at the end of 2023. Italy will promote investments in utility scale electricity storage to reach at least 70 GWh, and worth over Euro 17 bn, in the next ten years. ... Local industry contacts, as well as U ...

Specifically, hydroelectric power covered 8.9% of demand, solar power 9.2%, wind power 6.4%, bioenergy 5.6% and geothermal 1.7%. The fastest growing subsectors were solar and wind. In its National Resilience and Recovery Plan (NRRP), Italy devoted EUR59 billion (approximately US\$66 billion) to incentivize renewables in the 2021-2026 timeframe ...

The European Commission has approved a EUR17.7bn Italian scheme to support the development of a centralised electricity storage system, consisting of electricity storage ...

Figures by industry group Italia Solare put the current size of the Italian energy storage sector at approximately 450MW of total installed capacity. ... He added that there is real concern for storage project approval timelines to enable sufficient deployment and allow for the integration of Terna's renewable capacity goals, adding however ...

The European Commission has approved, under EU State aid rules a EUR17.7 billion Italian scheme to

support the construction and operation of a centralised electricity storage system. The ...

The Italian Ministry of the Environment and Energy Security (MASE) has said that it intends 65% of the country's electricity generation to come from renewable energy by 2030.

The European Union (EU) Commission has approved a state aid scheme aiming to fund the rollout of over 9GW/71GWh of energy storage in Italy. The scheme totalling EUR17.7 billion (US\$19.5 billion) will provide annual payments covering investment and operating costs for those developing, building and operating large-scale energy storage ...

The Italian Ministry of Environment and Energy Security has approved the volume of future energy storage capacity which Italian grid operator Terna has suggested is necessary to keep the lights by the publication of ...

It took two years for the Bologna-based independent power producer (IPP) to secure the approval for two battery energy storage projects in southern Italy. GreenGo plans to use these projects to participate in the ...

Key takeaways for Italian BESS investors. Let's now focus on 3 key takeaways for investors from the latest system operator updates. 1. Dynamic assessment of storage needs drives MACSE auctions. The MACSE auction quotas will evolve dynamically through time with the evolution of the Italian power market.

Italy is launching a state aid package of EUR 17.7 billion for the establishment of a centralized electricity storage system. The scheme is for developers of eligible projects to receive annual payments for investments and ...

Transmission System Operator ("TSO") and approved by the Italian Energy Regulator. The list of eligible electricity storage technologies will be revised every two years to reflect technological developments. Currently, eligible technologies include electrochemical lithium-ion storage, as well as hydro pumped storage plants.
