

What are the different types of energy opportunities in Jamaica?

Select opportunities exist in renewable fuels, electricity generation from renewable sources, electricity generation from conventional fuels, electricity grid management, including energy storage and also energy efficiency and conservation programmes. The following are frequently asked questions concerning Jamaica's energy sector.

What is happening in Jamaica's energy sector?

Jamaica's energy sector is dominated by relatively old and inefficient infrastructure that are now being prioritized for modernization and or replacement. Aged electricity generating plants and hydro skimming refinery technology are scheduled to be replaced and or upgraded respectively.

Where can I find information about the electricity sector in Jamaica?

The National Energy Policy 2009-2030, the Electricity Act 2015, the Petroleum (Quality Control) Act 1990 and the Jamaica Public Service Company Limited - Electricity Licence 2016 provide guidance to investors on the electricity sector. You may obtain further information on these documents at following link:

Is coal an option for electricity generation in Jamaica?

Yes, coal, a relatively cheap form of energy is included in the National Energy Policy as an option for electricity generation in Jamaica. Cognizant of the additional cost with associated externalities, strict environmental guidelines will accompany coal fired generation projects, if approvals were to be given.

Is Jamaica a good place to invest in energy?

Jamaica's Energy Sector currently provides good opportunities for interested investors. Select opportunities exist in renewable fuels, electricity generation from renewable sources, electricity generation from conventional fuels, electricity grid management, including energy storage and also energy efficiency and conservation programmes.

What percentage of Jamaica's energy is renewable?

According to the National Energy Policy, 20% of the energy supplied to the energy mix by the year 2030 should be generated from renewable energy (RE) sources. As at the year 2017, Jamaica's renewable energy capacity stood at 14.7% with net contribution to the national grid accounting for 11.2%.
