

Should Kazakhstan adopt an energy security strategy?

Global trend of tightening carbon regulation presents yet another impetus for broader modernization and systemic reforms of energy sector in Kazakhstan. Kazakhstan should articulate and adopt an official Energy Security Strategy document, guided by these general observations.

What is Kazakhstan's energy potential?

The potential of Kazakhstan's RES is substantial, though the share of RES in total energy supply is currently low, varying between 1% and 2%. Kazakhstan is to be congratulated for meeting its target for producing 3% of power from RES by 2020. The country aims to generate 15% of its electricity from RES by 2030, not including large hydropower.

Is Kazakhstan at a crossroads in its energy sector?

Kazakhstan, a vast and resource-rich nation in Central Asia, is at a crossroads in its energy sector. With a growing emphasis on sustainability and a need to align with global decarbonization efforts, the country is embarking on a transformative initiative that aims to ensure the security and reliability of its energy supply.

What is Kazakhstan's main source of energy?

Its second main source of energy production is coal, which accounted for 28%, followed by natural gas (17%). Kazakhstan's significant overall energy surplus has remained stable over the last two decades, averaging 230% of the energy supply needed to cover domestic demand.

What is Kazakhstan's energy surplus?

Kazakhstan's significant overall energy surplus has remained stable over the last two decades, averaging 230% of the energy supply needed to cover domestic demand. This has allowed Kazakhstan to be a large net exporter of fossil fuels, particularly oil.

Is Kazakhstan phasing out inefficient subsidies and modernizing its energy infrastructure?

Kazakhstan's energy sector has long been dependent on fossil fuels, and the country now faces the challenge of phasing out inefficient subsidies and modernizing its energy infrastructure.

Hevel Kentau Solar PV Park is a 20MW solar PV power project. It is planned in Turkistan Region, Kazakhstan. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently at the dormant stage. It will be developed in a single phase. [Buy the profile here.](#)
