

Who is Lumina solar?

Our founding and management team has over 45 years of residential solar experience. We have built our company efficiently to offer our customers a high quality experience. At Lumina, everything is about the customer. We make the process of going solar simple and enjoyable. We take care of all potential hassles, paperwork, and permits.

Is Lumina a good solar company?

Lumina has a team dedicated to helping you learn everything you need to know about the solar process and they keep you informed during the journey. Lumina was excellent with communicating every step and they managed all the paperwork, permits, installation, inspection, and warranty info.

Why should you choose Lumina?

Our team of industry veterans is creating a new and better customer experience that fully integrates technology to achieve your energy reducing lifestyle. Lumina believes that solar is always the better choice, and we have the expertise and tools to help get you there. Anyone who wants solar should be able to make the transition.

Why should you choose Lumina solar?

Lumina delivers as promised both from a commercial & technical perspective. The account manager was well informed, the back office managed the paperwork & permits in a very timely fashion, the installation team was fast, efficient & clean. The solar system & supporting software perform flawlessly. Very professional from sales to implementation.

Do Lumina solar panels produce more than 300 watts?

Lumina specified and installed 300 watt inverters so those panels never produce more than 300 watts. Instead of a sine wave for production I get a curve that is clipped flat on top. 300 watt inverters are ok for the back of the house where the sun angles are not as ideal and the panels cannot produce as much power, but not for the front.

Do Lumina employees work together?

In our observation we found that all employees of Lumina (salesman, system engineers and designers, schedulers, installation and inspection teams and project administrator) worked together seamlessly. We are now truly basking in the sun and seeing our solar production meet and exceed our electrical consumption.

Lumina Solar reviews and complaints, reviews of the brands of solar panels they sell, their locations and the cost of installations reported to us for 2024. Get the best deal.
