

Luyang energy storage application center factory operation

Who is Luyang energy saving materials?

Luyang Energy-Saving Materials Co.,Ltd. was established in 1984 and listed in Shenzhen Stock Exchange in Nov.2006. Luyang is a sino-foreign equity joint enterprise and integrating energy-saving products research and development, production, sales in the field of ceramic fiber, alumina fiber, soluble fiber, basalt fiber and insulating firebrick.

When did Luyang become a refractory fiber factory?

1995, Needled Blanket Production Line CBC - II was built. 1996, Luyang was identified as the "China largest Aluminium Silicate Refractory Fiber Production Base". High-grade product - zirconium fiber blanket was successfully developed and won the title of "National New Product". Luyang industrial park was completed in three years.

Is Luyang a listed company?

3rd Decade 2006, Luyang was listed in Shenzhen Stock Exchange (Stock Code: 002088). Subsidiary companies including Xinjiang Luyang, Guizhou Luyang, Inner Mongolia Luyang were built. Luyang was awarded the honors of "National Technology Center" and "National Laboratory".

Where are Luyang fibers produced?

Luyang has production bases in Shandong, Inner Mongolia, Xinjiang, Guiyang and Suzhou. Luyang fibers are produced in these locations. Luyang has maintained a leading position in scale, technology, variety and efficiency in domestic industries for many years and ascends among the world's ceramic fiber industry forefront.

How many patents does Luyang have?

Luyang Energy-saving Materials Co.,Ltd. holds 126 patents. The company has an annual output of 400,000 tons of various ceramic fiber products and 200,000 tons of rock wool products. Luyang has five production bases in Shandong, Inner Mongolia, Xinjiang, Guiyang and Suzhou.

What is Luyang known for?

Luyang is a company with national-recognized enterprise technology center and State Key Laboratory. It holds 126 patents and 54 scientific and technological achievements. Luyang has an annual output of 400,000 tons of various ceramic fiber products and 200,000 tons of rock wool products.

Luyang Energy-saving Materials Co., Ltd. was established in 1984 and listed in Shenzhen Stock Exchange in 2006 (Stock Code: 002088). Going through more than 30 years development, Luyang has become a world famous enterprise for new energy-saving materials researching, manufacturing and selling in the field of

Luyang energy storage application center factory operation

ceramic fibers, bio-soluble fibers, alumina fibers, rock ...

Last summer, Unifrax Asia-Pacific Holding (UAPH) completed its partial tender offer for Shandong Luyang Energy-Saving Materials (Luyang), an A-share company listed on the Shenzhen Stock Exchange (SZSE).

Luyang is a professional inorganic fiber materials manufacturer; drafting unit of international standards and national standards; leaders in energy-saving and environmental protection materials. Luyang has national-recognized ...

Luyang Energy-Saving Materials Co., Ltd. was established in 1984 and listed in Shenzhen Stock Exchange in Nov.2006. Luyang is a sino-foreign equity joint enterprise and integrating energy ...

The combination of long spun fibers and needling operation produce tough, resilient and strong blankets, which resist tearing both before and after heating. Luyangwool’s ceramic fiber blanket is completely inorganic and available in a variety of temperature grades, densities, and sizes.

Luyang Energy-saving Materials Co., Ltd. was established in 1984 and listed in Shenzhen Stock Exchange in 2006(Stock Code:002088).Going through more than 30 years development, Luyang has become a world famous enterprise ...

Luyang Energy-saving Materials Co., Ltd. was established in 1984 and listed in Shenzhen Stock Exchange in 2006(Stock Code:002088). Going through more than 30 years development, Luyang has become a world famous enterprise for new energy-saving materials researching, manufacturing and selling in the field of ceramic fibers, bio-soluble fibers ...

Luyang Energy-Saving Materials Co., Ltd. ... The combination of long spun fibers and needling operation produce tough, resilient and strong blankets, which resist tearing both before and after heating. ... Low heat storage . Typical Applications. Pipe wrap. Furnace and kiln back-up insulation. Chimney insulation. Annealing furnace linings ...

The combination of long spun fibers and needling operation produce tough, resilient and strong blankets, which resist tearing both before and after heating. ... 5.Low heat storage . Typical Applications: 1.Petrochemical process heater refractory fiber lining ... Packing & Delivery . Production Line. Luyang has an annual output of 400,000 tons ...

The combination of spinning and needling operation produce tough,resilient and strong blankets,which have superior thermal and mechanical properties. ... Our factory. Luyang has five production bases in Shandong,Inner ...

5.Low heat storage . Typical Applications: 1.Petrochemical process heater refractory fiber lining ... Luyang

Luyang energy storage application center factory operation

Energy-saving Materials Co., Ltd. was established in 1984. Going through more than 35 years development, Luyang has become a world famous enterprise for new energy-saving materials researching, manufacturing and selling in the field of ...

Luyang Energy-saving Materials Co., Ltd. was established in 1984. Going through more than 35 years development, Luyang has become a world famous enterprise for new energy-saving materials researching, manufacturing and selling in the field of ceramic fibers, soluble fibers, alumina fibers, rock wool fibers and insulating firebricks.

Usage: Iron Voltage Electric Material, Thermal Insulation Coatings, High Temperature Insulating Material, Pipe Wrap, Furnace and Kiln Back-up Insulation, High Temperature Classification: 1260°C Chemical Composition: ...

Luyang Energy-Saving Materials Co., Ltd. was established in 1984 and listed in Shenzhen Stock Exchange in Nov. 2006. ... Post-Doctoral research center, Shandong province ceramic fiber engineering technology research center with 193 patents and 55 technological achievements, the collaborative unit of the National "863" Program, four self ...

Low heat storage. Typical Applications. Pipe wrap. Furnace and kiln back-up insulation. Annealing furnace linings. ... Luyang Energy-saving Materials Co., Ltd. was established in 1984. ... Luyang technology center has more than 60 professional researchers, identified as provincial technology center in 2007 and became national-recognized ...

Luyang technology center has more than 60 professional researchers, identified as provincial technology center in 2007 and became national-recognized enterprise technology center in 2012. Luyang has 126 patents and 54 ...

Please rest assured to buy high quality Thermal Insulation Microporous Hard Board from our factory. ... 4. Low heat storage . Applications. 1. Back-up insulation in high-temperature furnaces. ... 4. Electronic devices. Company Profile. ...

1984, 2006, 11, ???, ...

LUYANGWOOL® Thermal Insulation Ceramic Fiber Blanket / RCF Blanket. Luyangwool® ceramic fiber blanket is high strength, needled insulating blanket that is made from Luyangwool® ceramic fiber bulk. The ...

Please rest assured to buy high quality Refractory Ceramic Fiber Board for Thermal Insulation Materials from our factory. ... imported rock wool production line with an annual output of 50,000 tons was put into operation. Recently. ...
