

Is Morocco dependent on Western Sahara for its energy supply?

But these developments have made Morocco partly dependent on Western Sahara for its energy supply. Morocco already gets 18% of its installed wind capacity and 15% of its solar from the occupied territory, and by 2030 that could increase to almost half of its wind and up to a third of its solar.

What is the future of Western Sahara?

"The present and future of (Western Sahara) lie within the framework of Moroccan sovereignty," he told an applauding audience at Morocco's Parliament.

Why did Morocco invade Western Sahara?

According to Morocco, Western Sahara formed part of the Moroccan sultanate before Spanish colonisation in the 1880s. However, that year the International Court of Justice disagreed, and urged a self-determination referendum on independence for the indigenous Saharawis. Nevertheless, Morocco invaded and used napalm against fleeing Saharawi refugees.

Is Western Sahara a 'question of decolonisation'?

Western Sahara is the only African territory remaining on the list. It's also the only territory where the administering power column is left blank - a footnote explains the UN considers it a "question of decolonisation which remained to be completed by the people of Western Sahara".

Western Sahara is very sunny and surprisingly windy - a natural renewable energy powerhouse. Morocco has exploited these resources by building three large wind farms (five more are planned)...
