

How to choose the right packing material?

In order to maintain an oxygen free state for a certain period of time, select packing material with a high resistance to oxygen permeability. AGELESS Pack use materials with a high gas barrier such as plastics, trays, metal cans and glass bottles.

What is a gas-tight package?

Gas-tight packages enable longevity and safety of components, particularly in critical environments where accessibility for repair or replacement is limited, such as medical implants or aerospace application.

How many MWh of battery energy storage systems will be delivered?

With successful deployment of over 3000MWh of Battery Energy Storage Systems (BESS) in more than 50 projects, we have an ambitious contracted pipeline promising to deliver over 5000MWh of energy storage solutions worldwide within the next three years.

Why is hermetic packaging important for optoelectronics?

Hermetic packaging is crucial for optoelectronics, as it seals and protects sensitive, high-performance components from moisture, dust, and gases. These contaminants can degrade performance, reduce optical clarity, and cause corrosion or malfunction.
