

Is Amprius a good EV Company?

Amprius CEO Dr. Kang Sun said, "With their superior energy and power performance, fast charging, wide operating temperature range, and safety features, Amprius is continuing to transform the EV sector and other electric mobility segments as we scale toward high-volume manufacturing." Read more: Amprius is going to open a new gigafactory in Colorado

What's new at Amprius?

Amprius celebrates expansion of its state-of-the-art silicon nanowire anode megawatt hour manufacturing line. Over 90 attendees enjoyed key partner presentations on the impact of Amprius' next-generation technology and an exclusive factory tour for a preview of Amprius' future.

Why is Amprius working with USABC?

Amprius has been working closely with USABC and the DOE on these cells as part of a \$3 million contract awarded in May 2022. The delivery of these sample cells marks the final milestone in that development project. Amprius is in talks with major automakers about adopting this tech more widely.

MWh Capacity for SiCore(TM) Cells with Shipments Beginning October 2024. FREMONT, Calif.--(BUSINESS WIRE)-- Amprius Technologies, Inc. ("Amprius" or the "Company") (NYSE: AMPX), a leader in next-generation lithium-ion batteries with its Silicon Anode Platform, today announced one of its contract manufacturing partners has opened new ...

Amprius Technologies ,?

A cracking, swelling battery anode is, of course, a safety concern. Physical damage can cause a thermal runaway, pressurizing the battery cell casing. Results can be anything from a smoking battery to a full explosion. Amprius' batteries do not face the same swelling and cracking issues, thanks to the nanowire technology that stabilizes the ...

Custom Battery Packs Deliver Unparalleled Energy Density for Electric Mobility Applications. FREMONT, Calif.--(BUSINESS WIRE)-- Amprius Technologies, Inc. ("Amprius") (NYSE: AMPX), a leader in next-generation lithium-ion batteries with its Silicon Anode Platform, today announced a strategic partnership with Stafl Systems, a pioneer in advanced battery ...

Amprius Technologies (NYSE: AMPX) has shipped SiMaxx(TM) A-Sample EV Cells to the United States Advanced Battery Consortium (USABC). Internal testing shows the cells achieve 360 Wh/kg specific energy, exceeding USABC's 275 Wh/kg target, with 1200 W/kg power density. The cells can charge to 90% in 15 minutes, surpassing USABC's 80% target. This ...

Amprius CEO Dr. Kang Sun highlighted the Company's breakthrough silicon anode battery technologies and

commented on the state of the lithium-ion battery industry, while CTO Dr. Ionel Stefan presented on Amprius' industry-leading commercially available high energy density SiMaxx(TM) battery cells delivering up to 450 Wh/kg and 1150 Wh/L.

"Amprius is a valued current supplier with a great track-record, and we are confident that Amprius' battery will deliver the capability we need." The record 500 Wh/kg energy density performance was verified by Mobile Power Solutions, a leading testing house offering comprehensive battery regulatory compliance, safety, and performance ...

The Republic of the Marshall Islands (RMI) is situated nearly midway between Hawaii and the Philippines, and is the easternmost island group in Micronesia. The country consists of two parallel chains of atolls and islands in the central Pacific Ocean, known as the Ratak (Sunrise) chain and Ralik (Sunset) chain. Together, the RMI is comprised of ...

FREMONT, Calif. - April 10, 2024 - Amprius Technologies, Inc. ("Amprius" or the "Company") (NYSE: AMPX), a leader in next-generation lithium-ion batteries with its Silicon Anode Platform, is pleased to announce it was named the CleanTech Breakthrough Battery Technology Company of the Year.. With nearly 1,300 submissions, the inaugural CleanTech Breakthrough Awards aims ...

Amprius Technologies announces the opening of new production lines by a contract manufacturing partner, significantly boosting capacity for SiCore batteries to meet growing market demand. ... ensuring customers have access to its industry-leading battery performance. Amprius' contract manufacturers will supply SiCore pouches in various ...

Temperature plays a major role in battery performance, charging, shelf life and voltage control. Extreme conditions, in particular, can significantly affect how a battery performs. ... Amprius is not responsible for and expressly disclaims all liability for damages of any kind arising out of the use, reference to, or reliance on any information ...

Amprius has successfully completed its scale-up manufacturing initiative under ManTech (a \$3 million development program grant), which included the delivery of safe cells for soldier-worn battery ...

Amprius' cell is >3x the discharge rate while sustaining the power delivery at lower DoD; resulting in extended usable battery capacity. Amprius' cell has > 40% higher GED across a significantly wider range of discharge rates Amprius' cell has the ability to stay cooler at higher discharge rates allowing

Delivered on schedule in September, the A-Sample EV cells shipment is the final milestone in the \$3M USABC technology development contract awarded to Amprius in May ...

FREMONT, Calif. - August 3, 2023 - Amprius Technologies, Inc. is continuing to pioneer innovative battery technology with its newest ultra-high-power-high-energy lithium-ion battery. Leveraging the company's

advanced material ...

Battery Basics: Past Progress and Future Potential. Batteries have evolved from the rudimentary, voltaic pile to advanced technologies, marking a trajectory of increased energy density, improved efficiency and diverse applications across industries. ... Amprius hypothesized that a silicon anode made from nanosized silicon wires would solve ...

Amprius Technologies, Inc. ("Amprius") (NYSE: AMPX), a leader in next-generation lithium-ion batteries with its Silicon Anode Platform, today announced it has shipped ...

Next-Generation Cell Redefines Electric Mobility with Unrivalled Power and Energy Efficiency. FREMONT, Calif.--(BUSINESS WIRE)-- Amprius Technologies, Inc. ("Amprius" or the "Company") (NYSE: AMPX), a leader in next-generation lithium-ion batteries with its Silicon Anode Platform, is continuing to pioneer innovative battery technology with its newest ultra ...

Using Amprius" battery cells, flight time for a UAS will be nearly doubled and Amprius plans to further leverage their silicon nanowire platform for UAS and other battery-powered technologies. (1) Actual percentage of silicon is 99.5-99.9% which is within the range of acceptable purity levels for materials that are considered 100%

Amprius Technologies is set to develop a 500 Wh/kg high-energy cell for the U.S. Army, utilizing the xTechPrime award to advance electric mobility applications for defense By William Mackenzie / 03 Sep 2024

Amprius began shipping its remarkable silicone-anode batteries in 2022, laying claim to the world's highest-density battery cells along the way.

To help meet this need, power supply developer Amprius Technologies will integrate new cells into next-generation wearable battery packs to equip dismounted soldiers with a rapidly available energy solution on the ...

Complementary to the Silicon Nanowire Platform (Under the New Product Platform SiMaxx TM), the New SiCore TM Platform Offers up to 400Wh/kg and as many as 1,200 Cycles. FREMONT, Calif.--(BUSINESS ...

Battery manufacturer Amprius Technologies has delivered the first of its new 450 Wh/kg, 1150 Wh/L high energy density lithium-ion cells. Compared with commonly available 300 Wh/kg batteries, the new cells represent a further improvement on the 405 Wh/kg devices unveiled in November 2021. ... Source: Amprius Technologies porous nanowires, which ...

Complementary to the Silicon Nanowire Platform (Under the New Product Platform SiMaxx TM), the New SiCore TM Platform Offers up to 400Wh/kg and as many as 1,200 Cycles. FREMONT, Calif. - January __, 2024 - Amprius Technologies, Inc. ("Amprius" or the "Company") (NYSE: AMPX), a leader in

next-generation lithium-ion batteries with its Silicon ...

Amprius Technologies has shipped its power-packed A-Sample EV cells to the United States Advanced Battery Consortium (USABC), a research collaboration between major automakers to advance EV ...

FREMONT, Calif. - August 3, 2023 - Amprius Technologies, Inc. is continuing to pioneer innovative battery technology with its newest ultra-high-power-high-energy lithium-ion battery. Leveraging the company's advanced material system capability, the cell achieves an impressive discharge rate of 10C while delivering 400 Wh/kg energy density, a major advancement for ...

Unveiled to significant attendee interest last week at the Commercial UAV Expo ("CUAV") in Las Vegas, the Tenergy x Amprius battery offers a 31% reduction in weight while still carrying a 6% greater energy than other comparable packs. "Through our partnership with Tenergy, customers can purchase this drop-in pack solution immediately, allowing end users to ...

Temperature plays a major role in battery performance, charging, shelf life and voltage control. Extreme conditions, in particular, can significantly affect how a battery performs. ... Amprius is not responsible for ...

Amprius has successfully completed its scale-up manufacturing initiative under ManTech (a \$3 million development program grant), which included the delivery of safe cells for soldier-worn...

The All-New Amprius 500 Wh/kg Battery Platform is Here FREMONT, Calif. - March 23, 2023 - Amprius Technologies, Inc. is once again raising the bar with the verification of its lithium-ion cell delivering unprecedented energy density of ...

FREMONT, Calif.--(BUSINESS WIRE)-- Amprius Technologies, Inc. ("Amprius" or the "Company") (NYSE: AMPX), a leader in next-generation lithium-ion batteries with its Silicon Anode Platform, is pleased to announce it was named the CleanTech Breakthrough Battery Technology Company of the Year. With nearly 1,300 submissions, the inaugural CleanTech ...
