

What is energy in Monaco?

Energy in Monaco describes energy production, consumption and importation in the Principality of Monaco. Monaco has no domestic sources of fossil fuels and relies entirely on imports of electricity, gas and fuels from France.

Who owns the electricity in Monaco?

Monaco's sole national power company is Soci  t   Monogaz de l'Electricit   et du Gaz (SMEG, Monegasque Electricity and Gas Company), which operates the country's electric and gas grid and provides related services. SMEG is 60% owned by Engie, 20% by the State of Monaco, 15% by EDF, and the rest by private investors.

How much electricity does Monaco use?

In 2018, the country used around 536,000 MWh of electricity, of which a majority of it was used tertiary services. The first and later sole electric plant was a gas-fired power plant built by the casino operator SBM at base of Fort Antoine in Monaco-Ville.

Is biomass a source of electricity in Monaco?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Monaco: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

Does Monaco use fossil fuels?

Monaco has no domestic sources of fossil fuels and relies entirely on imports of electricity, gas and fuels from France. Monaco's sole national power company is Soci  t   Monogaz de l'Electricit   et du Gaz (SMEG, Monegasque Electricity and Gas Company), which operates the country's electric and gas grid and provides related services.
