

What is Alfa Laval?

Alfa Laval is a world leader in heat transfer, centrifugal separation, and fluid handling. It is active in the areas of Energy, Marine, and Food & Water, and offers its expertise, products, and service to a wide range of industries in some 100 countries.

How much revenue did Alfa Laval generate in 2022?

Alfa Laval generated SEK 52.1 billion (approx. EUR 4.9 billion) in revenue in 2022. The company is listed on Nasdaq Stockholm. Alfa Laval has entered into a strategic joint venture agreement with Aalborg CSP, a concentrated solar power technology company, and will join forces on the development of Long Duration Energy Storage (LDES) solutions.

What is Alfa Laval doing in San Bonifacio?

Today Alfa Laval is hosting its annual Capital Markets Day in San Bonifacio, Italy, at one of the company's heat exchanger production sites. The company is presenting an update on its strategic priorities, financial targets and investment plans to secure continued growth.

How can Alfa Laval help your business transition to cleaner energy?

Alfa Laval has already partnered with customers to help support their transition to cleaner energy. Contact us today to learn how we can help your business. With leading heat transfer and separation technologies, Alfa Laval is supporting operations around the world with their clean energy transition.

Does Alfa Laval have a net zero launch event?

Join Alfa Laval's Net zero launch event #5!248 views 2023.10.10. Alfa Laval is back to introduce new innovations and insights within energy efficiency, clean... 162 views 2023.08.09. Liquid cooling can help data centers save up to 30% of their cooling energy costs, while reducing... 207 views 2023.08.03.

Why should you invest in Alfa Laval?

Following years of both organic and inorganic growth at Alfa Laval, coupled with significant investments in expanding production capacity and developing innovative solutions and products for the future, Alfa Laval is today presenting plans to secure further growth through technology and footprint investments.

Alfa Laval and Hyme Energy have signed a collaboration agreement to develop steam generators specialized for molten hydroxide salt energy storage. Thomas Møller, President of the Energy Division and Executive Vice President at Alfa Laval, and Ask Emil Løvschall-Jensen, CEO and co-founder of Hyme Energy, have just officially formalized this ...

Energy efficiency. La eficiencia energética es uno de los principales contribuyentes para alcanzar el Acuerdo de París. ... En Alfa Laval, llevamos décadas desarrollando tecnologías de intercambiadores de calor de placas que ayudan a las empresas a optimizar el uso de energía en sus

procesos. Nuestros productos se utilizan en todo, desde ...

In fact, Alfa Laval's heat transfer solutions save 100 GW of... Energy efficiency is in our DNA. It is something we have been developing for almost a century.
