Power outages are no match for these UPS battery backups. Brands like CyberPower and APC supply the best ones for your home office or small business.

These battery backup systems are line interactive, meaning that while the utility company's power is on, the system stays in standby mode. When the system is in standby mode, the utility keeps the batteries charged and transfers power to the unit. When the battery backup system senses a loss of utility power, it transfers to the systems' batteries.

If you've spent any time looking for a backup power UPS, then you already know that when it comes to an uninterruptible power supply, you have an unlimited number of options.
