

Will China build Namibia's largest solar power plant?

Namibia's state-owned power utility NamPower on Monday said it had signed a contract with two Chinese firms to start building the country's largest solar power plant.

How will solar power benefit Namibia?

The generation of solar power will complement Namibia's available green energy portfolio, such as hydro-electricity, which already constitutes more than two-thirds of our installed power capacity. Electrifying key parts of our economy and of our neighbours will spur unprecedented economic activity and growth for Namibia and Southern Africa.

Is Namibia a good country for solar?

The government recognises that Namibia is one of the best suited countries in the world for solar PV power generation and has a progressive national renewable energy policy. The key reason for this growth is that solar PV has become the cheapest source of electricity. Does Namibia have loadshedding?

Can Namibia's solar PV capacity be expanded?

HopSol spoke with ECP about how Namibia's solar PV capacity can be expanded and further integrated with the national grid.

Why do we need a green hydrogen industry in Namibia?

When you look at the recent oil and gas discoveries in Namibia, as well as green hydrogen initiatives, you will see drive and growth in this economy. A lot of people will come to Namibia, and from an energy point of view, we will see growth in energy demand. Therefore, we need to have industry participants gearing up and preparing for this growth.

Namibian utility NamPower has advanced plans for a 100MW solar PV project with the agreement of a financing deal and the appointment of contractors to build the plant.

The best way to know your company's standard is if they pass the test of NABCEP and at least have 2 years of hands-on experience in solar or a related field. ... highest worldwide.
