

Will new fortress energy build a LNG-to-power project in Nicaragua?

In 2020 New Fortress Energy announced plans to construct an LNG-to-power project on Nicaragua's Pacific coast, comprising the Puerto Sandino power station and the adjacent Puerto Sandino FSRU LNG Terminal.

Who was responsible for the construction of the Nicaragua power station?

The American company NFE Nicaragua Development Partners LLC was to be responsible for construction of the power station at a cost of \$700 million. Plans called for the plant be connected to the national electrical network (SIN).

What is the electricity system in Nicaragua?

The Nicaraguan electricity system comprises the National Interconnected System (SIN), which covers more than 90% of the territory where the population of the country lives (the entire Pacific, Central and North zone of the country). The remaining regions are covered by small isolated generation systems.

Does Nicaragua need a new generation power plant?

Maximum demand has increased in Nicaragua at an annual rate of about 4% since 2001, which has led to a low reserve margin (6% in 2006). Furthermore, demand is expected to increase by 6% per year for the next 10 years, which increases the need for new generation capacity.

What percentage of Nicaragua's electricity is produced by hydroelectric plants?

Currently, hydroelectric plants account only for 10% of the electricity produced in Nicaragua. The public company Hidrogesa owns and operates the two existing plants (Centrales Hidroeléctricas de Amoy y Santa Bárbara).

What is the CNE 'indicative plan' for electricity generation in Nicaragua?

In 2003, the CNE elaborated the "Indicative plan for the generation in the electricity sector in Nicaragua, 2003-2014", which aims to provide useful insight for private investors to orient their decisions on technologies to implement in the country.
