

Is Oztek part of trystar?

To strengthen its presence in renewables market, industrial power products manufacturer Trystar, based in Faribault, MN, has acquired Merrimack, NH based Oztek Corp, a manufacturer of commercial and industrial power conversion and power electronics products. The acquisition deal was closed on May 5, making Oztek part of Trystar.

Who is Oztek Corp?

We're excited to announce our acquisition of Oztek Corp, a manufacturer of commercial and industrial power conversion and power electronics products.

Why should you choose Oztek?

"Trystar is at the forefront of electrification, renewables, and power grid resiliency. Adding the Oztek products to our already extensive portfolio of electrical power products will allow us to create more complete, integrated solutions for our customers, particularly in wind, solar, microgrids, and battery storage applications.

Where are Oztek products made?

Headquartered in Merrimack, NH, Oztek products include battery inverters and energy storage power conversion systems, bi-directional DC power supplies, printed circuit power supplies for motor drives and inverters, as well as silicon controlled rectifier (SCR) controllers and firing boards.

What products does Oztek offer?

Presently, Oztek products include battery inverters and energy storage power conversion systems, bidirectional dc power supplies, printed circuit power supplies for motor drives and inverters, as well as silicon-controlled rectifier (SCR) controllers and firing boards.

Does Oztek still make power conversion systems?

According to Trystar, Oztek will continue to produce and expand its power conversion products offering for energy storage systems, with continued focus on compact, high-performing, long life solutions. It will now be called Power Conversion Systems Division of Trystar, said the buyer.

MERRIMACK, N.H. (June 15, 2021) Oztek Corp., a leading provider of power conversion systems, is now ISO 9001:2015 certified for the design, manufacturing, sale and repair of power control and instrumentation solutions. Certificate 18033QMS001 was issued on June 14 by ISOQAR, an independent, third-party certification body, after a successful audit. "To formally go through [...]"

OZPCS-EP40 provides the same grid-connected and grid-forming flexibility and performance as OZPCS-RS40 for solar+storage, resiliency, demand charge management, microgrid, and other energy storage applications, but in an wall-mount, outdoor-rated package.

Oztek's OZDSP2000 and OZDSP3000 are used by various customers in both the Wind and Solar industries. Oztek has also provided an OEM solution for a Solar DC/DC Boost Converter. The extension of 1603 should lead to more project launches in 2011.

Since joining Trystar in 2022, Oztek has expanded our offerings with its cutting-edge power conversion technologies, delivering tailored AC and DC power solutions across various critical industries. From advanced power inverters and ...

A power inverter is an electrical device that converts a direct current (DC) power source into an alternating current (AC) power source. In typical DC/AC power conversion applications, power inverters are used to convert DC power from sources such as batteries, solar panels, or high voltage DC transmission lines, into consumer AC that's used to run appliances, ...
