

Will Johnson Matthey's battery cathode materials plant be powered by electricity?

Johnson Matthey (JM), a leader in sustainable technologies, has confirmed that its battery cathode materials plant in Konin, Poland, will be powered solely by electricity from renewable sources from day one of production.

Who is Johnson Matthey battery systems?

Johnson Matthey Battery Systems supplies lithium-ion battery technology for cordless power tools, such as cordless hedge trimmers and lawn mowers. Its customers include several major producers of professional power tools, including Robert Bosch GmbH.

Why did Johnson Matthey exit battery materials?

The transaction is expected to complete over Summer 2022. Liam Condon, Chief Executive of Johnson Matthey, says: "Johnson Matthey made the decision to exit Battery Materials due to insufficient returns, increased commoditisation of battery materials combined with the need for very high capital investments to remain competitive.

Will Axpo power Johnson Matthey's new factory in Konin?

Axpo will provide renewable electricity to Johnson Matthey's new factory in Konin that is expected to commence commissioning in 2022 to supply automotive platforms for production in 2024. Using 100% renewable energy will significantly reduce the plant's carbon footprint and support Poland's shift to a lower carbon economy.

Johnson Matthey Battery Systems (JM Battery Systems) is a leading supplier of batteries for electric and hybrid vehicles. The company has deployed SAP solutions at its manufacturing site in Poland since 2014. However, JM Battery Systems UK was still running a non-SAP legacy system comprising multiple platforms.
