

Will energy storage facilities improve the stability of Poland's electricity grid?

On 23 July 2024, the National Fund for Environmental Protection and Water Management put under public consultation a new priority aid scheme entitled: "Energy storage facilities and related infrastructure for improving the stability of the Polish electricity grid".

When will the energy storage scheme be launched in Poland?

Call for applications under the Scheme "Energy storage facilities and related infrastructure for improving the stability of the Polish electricity grid" will be launched already this year. Subsidy contracts are to be entered into by the end of 2025, while the period for spending the funds ends with 2028.

How will a storage facility be financed in Poland?

Only storage facilities with at least 4 MWh capacity will qualify for the funding, which will be allocated through tenders managed by the Polish government. Projects selected for support will be connected to the national grid and play a key role in balancing supply and demand as renewable energy increasingly feeds into the system.

Does Poland need a state aid package for energy storage?

A panel discussion on the Polish market at the recent Energy Storage Summit CEE in Warsaw. Image: Solar Media The European Commission (EC) has approved a EUR1.2 billion (US\$1.32 billion) state aid package for Poland to support the deployment of electricity storage facilities.

Is a 2023 capacity auction a big step forward for Polish energy storage?

It looks to be a big step forward for the Polish energy storage market, which is already advancing into a leading position among Central and Eastern European markets, driven forward by a 2023 capacity market auction in which 1.7GW was awarded to energy storage bids.

What is the electricity storage support scheme?

The electricity storage support scheme aims to facilitate the reduction of fossil fuel use and the increased penetration of renewable energy on the Polish grid. Systems with 4MWh capacity or higher will be eligible, connected to either transmission or distribution networks at all voltage levels.
