

What does Drensky do?

Offering energy efficient power solutions,Drensky supplies and installs solar systems,inverters,UPS and related energy efficient products.

What services does Drensky offer?

Established in 2006,Drensky offers complete energy efficient power solutions,from design to installation and after-sales service. We supply solar systems,inverters,uninterruptible power supplies (UPS systems),battery back-up,lightning and surge protection,power regulation and monitoring,EXDE equipment and other related services.

How can Portugal meet growing energy demands in a sustainable way?

Meanwhile,the rapid expansion of hydroelectric and solar energy capacityis helping Portugal meet growing energy demands in a sustainable way. These efforts align with European Union objectives,such as the RePowerEU plan and the Renewable Energy Directive,which targets 42.5% renewable energy in total consumption by 2030.

How much energy does Portugal generate from renewables?

Portugal generated an 'historic' 95 per centof its electricity from renewables in April,according to the network operator REN. Renewable energy generation averaged just below that for the first four months of the year,covering 91 per cent of the nation's power needs.

How much does Portugal spend on energy RD&D?

Energy research,development and demonstration (RD&D) expenditure in the country reached 0.07% of GDPin 2019 (against 0.06% in 2016). The share of energy RD&D in total R&D expenditure evolved from 4% to 5% between 2016 and 2019. Portugal was among the first countries in the world to set 2050 carbon neutrality goals.

What is Portugal's energy import dependency?

In 2019,Portugal's energy import dependency was 74%,one of the highest levels among IEA member countries. Portugal has made progress on reducing energy import dependency by increasing the share of renewables in the energy supply,especially for electricity.

Renewable energy in Portugal was the source for 25.7% of total energy consumption in 2013. [1] In 2014, 27% of Portugal's energy needs were supplied by renewable sources. [2] In 2016, 28% of final energy consumption in Portugal came from renewable sources. [3]

Portugal is solidifying its position as a European leader in renewable energy, making significant strides toward a greener future. In 2023, renewable sources accounted for 61% of the country's electricity consumption, ...

During the first seven months of the year, renewable energy supplied 78% of consumption, divided between hydroelectric power (36%), wind power (27%), photovoltaic power (9%) and biomass (6%), while natural gas production supplied 8% of consumption and the remaining 14% corresponded to imported energy.

The extraordinary run commenced on October 27th, with Portugal's largest energy company, Redes Energéticas Nacionais, announcing that wind and wave conditions were fueling the entire national energy grid. 1 What began as a forecast for a few days extended into a groundbreaking run of 149 hours, during which Portugal not only met its energy needs but also ...

In Portugal, the primary regulators for energy activities (including renewable energy) are as follows. The Ministry of the Environment and Energy Transition, the mission of which is to formulate, conduct, implement and evaluate policies on the environment, spatial planning, cities, housing, urban, suburban and road passenger transport, climate, nature conservation and ...

**Green Hydrogen Vision** The Government of Portugal aims at achieving carbon neutrality by 2050 and envisages hydrogen as a fundamental vector for the decarbonization of various sectors of the national economy towards carbon neutrality goal.. Portugal is one of the leading economies in Europe based on renewable energy composition in the final energy consumption and aims to ...

Portugal was among the first countries in the world to set 2050 carbon neutrality goals. Portugal's energy and climate policies push for carbon neutrality primarily through broad electrification of energy demand and a rapid ...

gallery. portugal 2024 summary + 0. ... the available options to attend the event and enjoy a networking experience with top-level executives in the renewable energy sector. onsite pass. enjoy the event in person, attend the presentations, and maximize your networking opportunities through networking breaks, cocktails, and more.

A third of the way through the year, the renewable made up 7 per cent of Portugal's electricity mix, behind wind at 30 per cent and hydroelectric plants at 48 per cent.
