

When is energy storage International Conference & Expo 2025?

The 13th Energy Storage International Conference and Expo is scheduled for April 10-12,2025,and will be held at Beijing New International Exhibition Center Phase II.

What is China International Energy Storage Conference?

The China International Energy Storage Conference is a platform focusing on industrial energy storage manufacturing. Here we showcased new technologies and were very happy to see many customers coming to the booth to communicate. In the future,we will participate in the exhibition with better solutions.

What is the energy storage exhibition & docking platform?

It is one of the most influential industry exchange and docking platforms in the global energy storage field, and is known as a high-standard exhibition with high gold content and strong guidance in the energy storage industry. It is a weathervane for the development of China's energy storage industry.

Why should you attend Eesa China International Energy Storage Expo?

At EESA China International Energy Storage Expo (EESA EXPO),Asia's premier energy storage exhibition,the road ahead is paved with countless opportunities. From connecting with 150,000+of your peers to doing business with 600+exhibitors,It's an exhibition that yields benefits throughout the entire year.

Why should you attend energy storage Expo?

From connecting with 150,000+ of your peers to doing business with 600+ exhibitors, It's an exhibition that yields benefits throughout the entire year. Preview the latest energy storage products and solutions, tune in to the latest industry trends and expand global business networks.

Why did we attend the Cesc international energy storage Conference?

The CESC International Energy Storage Conference provided us with a broad communication platform,where we met many industry elites and gained a lot. The conference was well organized and the presentations were rich in content,which gave us confidence in the future of the energy storage industry.

The conference focuses on new energy storage technologies and applications (such as solid-state batteries, sodium-ion batteries, flow batteries, compressed-air energy ...
