

Why is the Russian energy sector important?

Because of the Russian Federation's role as a key oil and gas exporter, the Russian energy sector is of key importance to the country's economic success, as well as to world energy markets.

How is Russia using energy in Central Asia?

Russia is using energy to enhance its influence in Central Asia and achieved notable successes in 2023, including building generating capacities, increasing electricity and hydrocarbon supplies to the region, and developing its transit potential to China.

What type of energy is used in Russia?

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. Russia: How much of the country's energy comes from nuclear power?

Why are reforms important for Russia's energy sector?

Reforms are essential to enable Russia's energy sector to keep pace with domestic energy demand growth in a period of strong GDP growth, while yet seizing export opportunities.

Does Russia rely on energy-related revenue?

economic engagement with Russia (and, of course, with China). US Allies Russia's reliance on energy-related revenue may be a source of vulnerability, but energy-related exports are at best a point of mutual vulnerability, in that removing them from global markets reduces supply, increa

Is Russia ready for a transition to low-carbon energy?

"The global economy is focused on a gradual transition to low-carbon energy," said Russia's prime minister Mikhail Mushustin, during a meeting with ministers in late September. "This is already a new reality. We need to prepare for a phased reduction in the use of traditional fuels - oil, gas, coal."

The stakes are high. The European Union imported nearly EUR100 billion (\$110 billion) worth of Russian energy last year. Russia supplies about 40% of the bloc's imports of natural gas, and about ...
