

What percentage of Denmark's energy is generated from renewable sources?

In 2017 fossil fuels and other non renewable sources accounted for just 28.6% of Denmark's total net generation and continues to decline against a total of 71.4% generated from renewable sources. *excludes internal consumption by plant. **figures in italics include photovoltaics. ***includes biofuels and biodegradable fraction of waste.

What percentage of Danish electricity is generated by renewables?

The table above shows the proportion of total Danish electricity generated by renewables rose between 2007 and 2017 from 28.1% to 71.4%. Total renewable electricity generation grew from 10.4 TWh in 2007 to 21.0 TWh by 2017.

What are renewables used for?

Renewables are mainly used to generate electricity, though renewable technologies can also be used for heating in homes and buildings. Renewable biofuels are also an emerging technology solution to decarbonise parts of the transport sector.

SIMEC Atlantis Energy Limited ("SAE Renewables", "SAE" or the "Company") Update on Abundance voting Following the announcement on the 5 December 2023, SAE confirms that more than 75% of each class of the Abundance bondholders by value have voted in favour of the requested amendments to the debenture deeds. SAE takes full ownership of 120MW/240MWh BESS project at Uskmouth SAE has achieved the next step in delivering its "Building a Sustainable Future to 2035" strategy by taking full ownership of the 120MW Battery Energy ...

The Mey BESS project will see a 1200 MWh Battery Storage project delivered at a critical site for renewable energy projects. With huge expansion planned for onshore and offshore wind and our own tidal stream project, it is a perfect location for a battery storage project.

SAE is proud to own the largest consented tidal stream project in the world, MeyGen. SAE has developed the 398MW MeyGen site since its acquisition in 2010. The site is already delivering predictable, renewable power and SAE is focused on delivering its full capacity, to help unlock this critical technology.

This site was originally identified by SAE in 2007, following a global review of tidal resource which concluded that the high flows, medium water depths and proximity to the mainland rendered it a prime location for development. The MeyGen project is the largest planned tidal stream project in ...

The securities of SAE are traded on the AIM market operated by the London Stock Exchange plc and its shares have not been admitted, nor have any applications been made, for any of its shares to be admitted or

traded on any other exchanges or trading platforms. There are no restrictions on the transfer of shares in SAE.
