

What is the Grid Modernization Initiative (GMI)?

The Grid Modernization Initiative (GMI) works across the U.S. Department of Energy (DOE) to create the modern grid of the future. Our extensive, reliable power grid has fueled the nation's growth since the early 1900s; however, the grid we have today does not have the attributes necessary to meet the demands of the 21st century and beyond.

Why should we modernize our power grid?

Modernizing the nation's power grid to accommodate more clean energy resources while being resilient, reliable, and secure in the face of increasing extreme events and man-made threats is critical to our national security and economic prosperity.

What is support grid modernization?

Institutional Support Grid modernization presents a complex bundle of technological, institutional, and regulatory challenges. The institutional support area informs key stakeholders involved in the electric power system so they can make the best decision possible in a rapidly changing

How can integrated grid planning and resilience planning be used in institutional support?

For technical teams. For example, the integrated grid planning and resilience planning activities in institutional support can inform use cases, modeling needs/gaps, and tools development in the planning and design tools technical area and can inform valuation and metrics development in the resilience

What is included in the grid modernization crosscut?

Research is included in the Grid Modernization crosscut. In FY 2024, DOE plans to continue pursuing research of technologies that improve grid reliability, resilience, efficiency, flexibility, and functionality. These activities include developing technologies, from inception to demonstration, that automa

What technologies are required for successful grid integration?

to ensure the reliability and security of the energy system. The suite of technologies and techniques required for successful grid integration includes improved approaches to renewable power forecasting; application of energy storage technologies; advanced power electronics; "grid responsive" building technologies; vehicle-to-grid technologies; and ne

2 &#0183; The Grid Modernization Initiative (GMI) works across the U.S. Department of Energy (DOE) to create the modern grid of the future.

The results will inform the upcoming 2024 Grid Modernization Index Report, which is targeted for publication in December. Utilities, transmission entities, state utility regulators, state energy officials, governors' staff, and other grid stakeholders should join the webinar to learn more about the Grid Modernization Index process and how to ...

Department of Energy's Grid Modernization Lab Call (2019) 5 o Impact on the Bulk Power System: Proposals must focus on the bulk power system impacts. Any proposals including DER must show impact on the bulk power system. o Demonstrated Near-term Success: To increase likelihood of industry implementation and increase potential impact, it is critical that ...

Why do we need grid modernization? History: Beginning in 2015, GMI has leveraged the expertise of DOE Offices, National Labs, and partners to conduct over \$300M in cutting-edge R& D on ...

Grid Modernization Initiative Overview. 2 Increasing Extreme Events Increasing Security Threats. Growing Number of Prosumers. ... and partners to conduct over \$300M in cutting-edge R& D on grid modernization topics. Integrated Vision: Focuses on a fully-integrated electricity system from generation to load, including independent infrastructures. ...

a. proposing a set of objectives for grid modernization in Minnesota and outlining the functions and technologies a modern grid will need b. suggesting an overall approach to grid modernization c. offering next steps and recommendations that can usefully complement the Minnesota PUC's ongoing grid modernization process. Subgroup Participants

The Department of Energy's Grid Modernization Initiative (GMI) has announced its strategy for investing in innovative new technologies to modernize today's power grid while ensuring it remains secure and sustainable. The GMI coordinates key research, development, demonstration, and deployment activities across the Department to maintain and ...

FEDERAL-STATE MODERN GRID DEPLOYMENT INITIATIVE 3 Federal-State Modern Grid Deployment Initiative Principles In the face of growing needs for modernization of the U.S ...

The US government has introduced the Federal-State Modern Grid Deployment Initiative to enhance the capacity, reliability and resilience of the country's electricity grid. 21 states have agreed to prioritise modern grid ...

GRID MODERNIZATION INITIATIVE PEER REVIEW 1.2.1 Grid Architecture JEFFREY D. TAFT, PHD (PNNL) 5/11/2017 1 April 18-20, 2017 Sheraton Pentagon City - Arlington, VA System Operations, Power Flow, and Control. System Operations, Power Flow, and Control 5/11/2017 2 Project Objectives

Today, the U.S. Department of Energy (DOE) announced up to \$39 million in investment from the 2023 Grid Modernization Initiative lab call for projects across DOE's National Laboratories to help modernize the electricity grid. Grid Modernization Initiative. August, 31 2023.

The vision of DOE's Grid Modernization Initiative (GMI) is: A future grid that will solve the challenges of seamlessly integrating conventional and renewable sources, storage, and central and distributed generation.

The future grid as a critical platform for U.S. prosperity, competitiveness, and innovation in a global clean energy economy. A ...

ensure a resilient, reliable, secure, affordable, flexible, environmentally sustainable, and equitable grid. The portfolio of grid modernization work helps integrate all sources of electricity, improve ...

of a new Grid Modernization Multi -Year Program Plan (MYPP); and o Supporting regional, state, and local groups of stakeholders from industry, academia, communities, and local regulators, that will help translate the tools and knowledge from Grid Modernization R& D into actual deployments of modernized grids. 11

Grid Modernization Lab Call: Proposed Pioneer Partnerships 12 . \$8M for 18 monthsThe Pioneer Regional Partnerships are early-stage public/private collaborative projects that address specific near-term grid modernization issues important to that region and its stakeholders.

GRID MODERNIZATION INITIATIVE PEER REVIEW GMLC 1.4.29 - Future Electric Utility Regulation  
LISA SCHWARTZ, BERKELEY LAB 5/11/2017 April 18-20, 2017 Sheraton Pentagon City - Arlington, VA  
Institutional Support. Institutional Support 5/11/2017 2 Project Description

Since its inception, the GMLC has collaborated with more than 200 industry partners to solve key, crosscutting grid modernization challenges in a range of critical areas, including grid design ...

DOE has been developing a grid modernization strategy and a roadmap under its Grid Modernization Initiative (GMI). Specifically, in the report accompanying the House's 2022 Energy and Water Development and Related Agencies Appropriations Bill (H. Rpt. 117-98, page

These forces challenge the capacity of the grid to provide us with the services we need, but they also provide us with the opportunity to transform our grid into a platform for greater prosperity, growth, and innovation. The structure of the 20. th century grid, however, cannot meet all the demands of the 21 st century.

2 Overview of the Grid Modernization Initiative Overview of the Grid Modernization Lab Call (2016) Results from the Grid Modernization Peer Review Lab Call: Resilient Distribution Systems (2017) Investigating Cybersecurity in EERE ...

requested an update to the grid modernization strategy. 11, 12. This document summarizes an overarching grid modernization strategy, which serves as the foundation for future investments and coordination for grid modernization RDD& D at DOE. 2 Drivers for a Better Grid and an Updated Grid Modernization Strategy

An important and often overlooked aspect of a grid modernization initiative is to define an approach for handling the influx of grid data generated by the investments--consider AMI, which typically replaces the monthly meter readings collected through analog infrastructure with up to 105,000 digital readings per year. Transmitting and storing ...

The Grid Modernization Initiative (GMI) works across the U.S. Department of Energy (DOE) to address the research and development (R&D) challenges facing the 21st century grid. Modernizing the grid is essential for achieving the administration's goals of 100% clean

Grid Modernization Initiative The vision of DOE's Grid Modernization Initiative (GMI) is: o A future grid that will solve the challenges of seamlessly integrating conventional and renewable sources, storage, and central and distributed generation. o The future grid as a critical platform for U.S. prosperity, competitiveness, and

The Grid Modernization Laboratory Consortium (GMLC) coordinates and executes research and development in support of the Department of Energy's Grid Modernization Initiative. The GMLC ...

GMI Grid Modernization Initiative . GMLC Grid Modernization Laboratory Consortium . HELICS Hierarchical Engine for Large-scale Infrastructure Co-Simulation . ... st century. Traditional grid architecture was based on large -scale generation remotely located from consumers, centralized control structures with minimal feedback, limited energy ...

Grid modernization will require a suite of policy changes to support advancements in grid technologies, grid management, and utility regulation. While there is new federal funding available in the Infrastructure Investment

Grid modernization and reliability is an inherent component of the Building a Better Grid initiative, which turned one year old last week. The Initiative is identifying national transmission and distribution needs and supporting the deployment of interstate, high-voltage lines that connect clean energy resources to where the power is needed and ...

During her address she noted that whilst St Helena currently generated 21% of its electricity supply through renewables (wind and solar), this Government's goal is to deliver ...

WASHINGTON - The U.S. Department of Energy (DOE) today built on its Grid Modernization Initiative - an ongoing effort that reflects the Obama Administration's commitment to improving the resiliency, reliability, and security of the nation's electricity delivery system. During his visit to a utility control center in Miami, FL today, Energy Secretary Ernest Moniz announced the release ...

Department of Energy established the Grid Modernization Initiative. Through this Initiative, DOE is working with public and private stakeholders to develop the concepts, tools, and technologies needed to measure, analyze, predict, ... Delivering a Power Grid for the 21st Century . PNNL-SA-124564 THE CHALLENGE For the next several decades ...

The Grid Modernization Initiative (GMI) coordinates research and development (R&D) across the U.S.

Department ... st century. Traditional grid architecture was based on large -scale generation remotely located from consumers, centralized control ...
