

What is Seiko Astron GPS solar?

In 2012, Seiko took electronic watchmaking to a new level with the Astron GPS Solar, which connects to the Global Positioning System (GPS) and adjusts to every time zone\* while generating all the energy it needs from light alone. Today, the Seiko Astron GPS Solar collection adds four new watches that feature a dynamic and robust design.

What type of capacitor does Seiko use?

It can store energy when it is charged and will release energy when discharged. Seiko used two types of capacitors for its early Kinetics and A.G.S/Auto Quartz (pre-Kinetic) models. The earlier type was outsourced from the established Japanese electronics giant, Matsushita Electric, which is now known as Panasonic.

What's new in the Seiko Astron solar collection?

Today, the Seiko Astron GPS Solar collection adds four new watches that feature a dynamic and robust design. This new series includes three watches that will join the main Astron collection, with dials in blue, grey, and black, and a limited-edition watch with a unique, horizontally-striped design.

How does a Seiko 5M42 work?

A closeup of the Seiko 5M42 movement, showing its coil block, oscillating weight and the capacitor (borrowed photo). The capacitor (or condenser) is fundamentally an electronic device with two electrodes which are separated by a dielectric insulator. It can store energy when it is charged and will release energy when discharged.

What is a Seiko 3X62?

Powered by Seiko's new GPS solar caliber 3X62, with the improved receiver sensitivity required by the metallic bezel, this exceptional watch is GPS controlled for high-speed time and time zone adjustment to 39 time zones, and includes an in-flight mode and perpetual date calendar correct to the year 2100.

Is a Seiko Kinetic right for You?

Unlike a solar powered watch that you can recharge by merely exposing it to light, you need to wear a Kinetic as often as possible. And if you're a physically active person, a Seiko Kinetic would be right for you. The Seiko Kinetic is an interesting hybrid movement combining the best of mechanical and quartz technologies.

Seiko ist eine der selten vollintegrierten Uhrenmanufakturen. Wir entwerfen und entwickeln unsere eigenen Uhrwerke durch die fortgeschrittene Kantentechnologie.

Meer dan 100 jaar geleden produceerde Seiko Japans" eerste polshorloge en legde daarmee de basis onder een inmiddels lange traditie van groot vakmanschap. Tot op de dag van vandaag delen de horlogemakers van Seiko ...
