

How much does a smartflower Solar System cost?

If we consider the price per watt for new solar systems is generally in the \$3-\$4 range in 2023 according to national estimates, then a Smartflower system costs between three and four times as much as conventional rooftop solar. And that's with the 40% bump in energy production from Smartflower's dual-axis tracking already factored in.

What is a smartflower Solar Flower?

The Smartflower solar flower is an all-in-one ground-mounted solar system with a tracker that follows the sun. However, it doesn't look like the solar panels you might be used to. Learn all about the product, how it compares to other solar options, and whether you should consider one for your home in our Smartflower solar review.

How much does it cost to install a smartflower?

The cost to install a Smartflower ranges from \$25,000 to \$30,000, with the average U.S. customer likely paying around \$27,000. Pricing for the Smartflower PLUS and the Smartflower with integrated car charging is not yet available. The best way to compare solar panel system prices is to determine the cost per watt of electricity generation.

Is smartflower still available in Europe?

Since the Austrian company SmartFlower Energy went bankrupt, it is no longer purchasable in Europe. This said, an equivalent model simply named "SmartFlower" is still commercialised in the US. This model is very similar to the POP version, aside it being slightly more powerful (205 kWc) and available in fewer colours (white, grey, green and blue).

How much does a smartflower panel cost?

Smartflower closes when the sun goes down. How much do Smartflower panels cost? The base Smartflower itself is \$39,950 plus installation and shipping charges, and the Smartflower Plus is \$65,500 plus shipping and installation.

Does smartflower work in France?

Additionally, the SmartFlower can work in virtually any climate, as it can work at any between -20°C and 50°C. It will thus be usable anywhere in France, at any time of year. The first model introduced was SmartFlower POP.

The best way to compare solar panel system prices is to determine the cost per watt of electricity generation. The cost per watt for a Smartflower is anywhere from \$6.25 to \$7.50, with an average price of about \$6.75, assuming that it is equivalent to the production of a 4 kW fixed rooftop array. The installed cost depends on how far the Smartflower is installed from the ...
