

Does French Guiana have a pluriannual energy program?

As Guadeloupe, Martinique, Reunion and Mayotte, French Guiana has its own pluriannual energy programming. With an objective of energy autonomy set on the 2030 horizon, they have to accelerate the large-scale clean energy deployment to improve energy access.

Does French Guiana have a role in the National Energy Transition?

French Guiana as a French overseas territory can play a fundamental role in the national energy transition. Even though, it is already well positioned regarding the share of renewable energy in the final energy consumption, its dependence on fossil fuels remains a problematic.

How much energy does French Guiana use?

Electricity grid in French Guiana In 2014, the external supply represented around 80% of the total primary energy consumption (235 ktep). Transport and electricity were the most intensive sectors regarding the total primary and final energy consumption (222 ktep) in 2014 .

How does ceog fit with French Guiana's energy strategy?

The population of French Guiana is very quickly increasing. Guiana has to face a considerable energy deficit, especially in the west where the demographic growth is booming. By providing several MW of reliable and clean energy, CEOG fits with French Guiana's energy strategy.

Does French Guiana have a lack of energy?

The lack of access to energy in the inland areas is a key issue at the heart of French Guiana's pluriannual energy programming. With an electrification rate of dwellings four times lower than the regional average , the energy precariousness, if no further action is taken, should worsen.

How will EDF power French Guiana?

It will be connected to French Guiana's electricity grid through EDF's substation in Saint-Laurent-du-Maroni. The facility will provide reliable and clean electricity to power up to 10,000 French Guiana households. It will meet half of the energy demand in Saint-Laurent-du-Maroni and the Mana commune of French Guiana.
