

What is the energy source in Somalia?

Most of the energy in Somalia is from charcoal and wood, and 90% of the country does not have access to electricity. [5]^Seizing Power - Somalia's alternative energy sector holds huge potential..

Can BECO's solar power plant lift Somalis out of poverty?

BECO's solar power plant could have a significant impact on Somalis, lifting many out of poverty. Lack of access to electricity is widely cited as a large contributor to poverty. Without electricity, families don't have a non-polluting source of energy for cooking. Refrigerators are unusable. Children can't do their homework after dark.

How can BECO's new solar power plant help Somalia?

Because Somalia struggles with a lack of electricity and high electric costs, BECO's new solar power plant has the potential to positively impact many people's lives. When it opened, the power plant had the capacity to produce 8 MW.

How much power does BECO produce in Somalia?

Currently, BECO produces 35 MW of power for eight cities, which is much less than its demand of 200 MW. Many Somalis avoid using electricity in order to avoid the monthly costs as 69% of Somalis are currently living in poverty. Power companies in Somalia heavily rely on imported fossil fuels for diesel-powered generators.

The Ministry of Energy and Water Resources (MoEWR) of Somalia has issued a competitive tender for the provision of solar and storage technology at 46 different sites in the capital Mogadishu. The government ...
