

What are the major oil companies in South Korea?

South Korea's downstream oil and natural gas sector includes several large international oil companies (IOCs) such as SK Energy, the nation's largest IOC. SK Energy is the largest marketer of petroleum products, followed by GS Caltex, S-Oil, and Hyundai Oilbank.

Does South Korea have a wind power plant?

In 2020, one of KEPCO's power generation subsidiaries, Korea Hydro & Nuclear Power Co. Ltd., acquired a 49.9% interest in an 852-MW portfolio of wind generating assets in the U.S. South Korea is targeting renewable energy resources to make up 20% of its power generation mix by 2030 and 30%-35% by 2040, according to the International Energy Agency.

Why is South Korea a major energy importer?

South Korea is one of the world's leading energy importers because of its insufficient domestic resources. Despite its lack of domestic energy resources, South Korea is home to some of the largest and most advanced oil refineries in the world, and it exports a significant amount of refined fuel for transportation use.

How to reduce South Korea's reliance on foreign energy imports?

To reduce South Korea's reliance on foreign energy imports, the Ministry of Trade, Industry and Energy (MOTIE) established self-sufficiency targets in oil and natural gas for South Korea's energy companies based on their domestic and overseas production levels each year starting in 2008.

Does South Korea have a moratorium on overseas coal projects?

In 2021, South Korea agreed to place a moratorium on overseas financing of coal projects. Historically, South Korea was one of the largest providers of financing for coal projects. Investments, since 2010, totaled \$5.8 billion in overseas coal projects, most of which have gone to Southeast Asia.

Is South Korea a good country for oil & gas?

South Korea has some of the most advanced oil refineries in the world, and its companies have investments in overseas oil and natural gas assets. According to the Oil & Gas Journal (OGJ), 3 of the 10 largest crude oil refineries in the world are located in South Korea, making it one of Asia's largest petroleum product exporters.⁶
