

Where can I find information about energy in South Sudan?

Find relevant data on energy production, total primary energy supply, electricity consumption and CO₂ emissions for South Sudan on the IEA homepage. Find relevant information for South Sudan on energy access (access to electricity, access to clean cooking, renewable energy and energy efficiency) on the Tracking SDG7 homepage.

Why is South Sudan facing a serious energy crisis?

South Sudan faces a serious energy crisis due to a number of factors, including devastating conflicts (e.g. 1955-1972, 1983-2005 & 2013-present) and reliance on the fossil fuel source. The country has the lowest energy consumption rate in Africa and the highest cost of producing energy (World Bank, 2016).

What are the energy indicators for South Sudan?

(Sustainable Development Goal indicators 7.1 energy access, 7.2 on renewable energy and 7.3 on energy efficiency). Find a summarized energy profile for South Sudan (Atlas of Africa Energy Sources). Climatescope 2019 lists the clean energy policies and investments for South Sudan.

Why is energy infrastructure underdeveloped in South Sudan?

Partly due to the civil wars (e.g., 1955-1972, 1983-2005 & 2013-present), energy infrastructure remains very underdeveloped in South Sudan. Despite a peace agreement in 2015, which has been revitalized recently, conflict has impeded the country's effort in transitioning to renewable energy.

Does South Sudan have electricity?

The war has destroyed South Sudan's limited infrastructure, triggering an economic implosion. What electricity it has--and it is the least electrified country in the world--depends entirely on imported diesel to run generators.

How does lack of electricity affect business in South Sudan?

Specifically, over 75% of firms surveyed in South Sudan complained that lack of energy hinders business operation. Second, lack of electricity drives up costs as businesses and families try to produce their own power, which is extremely expensive.
