

Does Curaçao use wind and solar energy?

Since the 1980s, Curaçao has been gaining experience in applying wind and solar energy. Curaçao also distinguishes itself from the world with regard to the application of wind and solar energy. In addition, the focus is also on the use of biogas, energy storage and energy savings. Bulbaai conducted an extensive research in Curaçao.

How much electricity does Curaçao produce?

Unlike most countries in the world, Curaçao generates about 34 percent of the current electricity production through wind and solar energy. In the Netherlands, that is merely 6 percent. Engineer Richenel Bulbaai from Curaçao defended his dissertation on this subject on 11 October 2019 at the University of Twente.

Does Curaçao have energy-efficient air conditioning?

Bulbaai conducted an extensive research in Curaçao. He analyzed the energy use of almost 400 households, more than 300 offices, 22 hotels, and 9 supermarkets. Many offices were already taking energy-efficient measures, mostly to save on costs. But of the 22 hotels, only sixty percent had energy-efficient air conditioning.

The Government of Curaçao has asked Fugro to map the seabed of the island's surrounding waters for future development of floating offshore wind farms. The Curaçao Government's target is to realise 6GW in ...
