

Does stem stem have a solar power plant in Hungary?

Stem STEM recently announced that its solar monitoring and optimization solutions are operational now in Hungary's largest solar power plant, Mezocsát. This is the company's fifth utility-scale project in Hungary and strengthens its leadership in Eastern Europe.

What is stem doing in Hungary?

This is the company's fifth utility-scale project in Hungary and strengthens its leadership in Eastern Europe. The 304 MW DC power plant uses Stem's Athena platform, which includes AlsoEnergy's PowerTrack and PowerManager Control Solutions, to reduce Hungary's dependence on natural gas and increase renewable energy production.

What does stem do for Hungarian energy?

It is connected to the Hungarian grid and supports the country's goal of energy sovereignty and production. Stem has seen success in its international strategy with the activation of clean energy assets, especially as Europe prepares for the Net-Zero Industry Act.

Does stem have a competitive market?

Stem operates in a highly-competitive market for clean energy software and services, where it faces competition from players like SES AI, SES, ESS Tech, GWH and PAR Technology. PAR. Shares of PAR Technology have gained 21.7% year over year. Shares of SES AI and ESS Tech have lost 21.6% and 38.7% year over year, respectively.

The announcement follows Stem's successful launches of four other 60 MW projects in Hungary over the past year and further solidifies the company's utility scale leadership in Eastern Europe.

Technology alliance to leverage Stem's AI-driven software and SB Energy's Digital Platform to deploy flexible, reliable, and cost-effective clean energy at scale. Multi-year commercial agreement to span SB Energy's development pipeline of 10 gigawatt hours (GWh) of energy storage projects. Stem (NYSE: STEM), a global leader in AI-driven clean energy ...

Athena, Stem's AI clean energy platform, includes AlsoEnergy's PowerTrack and PowerManager Control Solutions (PMCS), which are designed to help the 304 MW (DC) power plant reduce Hungary's reliance on natural gas and increase the amount of electricity generated from alternative energy sources.

Stem Inc's shares begin trading on the New York Stock Exchange today, after the "artificial intelligence-driven clean energy storage services" company completed its business combination with special purpose ...
