

Can a concentrated solar power system work in Turkmenistan?

Under high solar radiation conditions, like Turkmenistan, the concentrated solar power may be able to generate electricity at costs below 5-6 cents per kWh. Our technical experts are considering a design to operate primarily at night, with more than 9 to 10 hours of storage.

Could Turkmenistan become a leader in solar energy in Central Asia?

Could Turkmenistan be a power source for Central Asia?

Turkmenistan has vast land mass and technically could be the power source for the entire central Asian region but this time with power from solar not just from gas. Concentrated solar power is an approach to generating electricity in which mirrors are used to reflect, concentrate, and focus sunlight onto a specific point.
