

How much solar power does Liechtenstein produce a year?

Seasonal solar PV output for Latitude: 47.1322, Longitude: 9.5115 (Vaduz, Liechtenstein), based on our analysis of 8760 hourly intervals of solar and meteorological data (one whole year) retrieved for that set of coordinates/location from NASA POWER (The Prediction of Worldwide Energy Resources) API: Average 5.71kWh/day in Summer.

Is Liechtenstein a good place to install solar power?

Vaduz, the capital city of Liechtenstein, is a suitable location for solar photovoltaic (PV) power generation with its latitude at 47.1322 and longitude at 9.5115. Throughout the four seasons, the average kilowatt-hours (kWh) produced per day for each kilowatt (kW) of installed solar capacity varies significantly.

Will Hilti build the largest photovoltaic plant in Liechtenstein?

Schaan (FL), April 27, 2022 - By the end of 2022, Hilti will build the largest photovoltaic plant in Liechtenstein at its headquarters in Schaan. More than 4600 solar modules, installed on an area of around 1.5 soccer fields, will supply the Hilti Campus with solar power in the future.

How much solar energy does Vaduz produce a day?

In summer months, Vaduz experiences peak solar energy production with an average daily yield of 5.71 kWh/kW due to longer daylight hours and higher sun position in the sky. The energy production slightly drops in spring to an average daily output of 4.85 kWh/kW as sunlight duration decreases gradually.

Sunday Solar is your affordable solar solution for all your commercial needs. Let us help you save money for your business, and use local and Federal Incentives to get you solar for almost no cost! Office: +1-434-977-4292
