

Where can I buy Shenzhen Sunlord electronics products?

Our product lines have been widely applied to communications, consumer, computer, lighting, security, smart grid, medical equipment, automotive, aerospace and etc. Avnet APAC is an authorized distributor of Shenzhen Sunlord Electronics products. Check stock, price and buy Shenzhen Sunlord Electronics components online with same-day shipping.

Who is Nanjing Sunlord Electronics Corporation?

Nanjing Sunlord Electronics Corporation Ltd. distributes electronic components in China. The company operates in automotive electronics, network communication, new energy, big data, communication systems, industrial control, artificial intelligence, and consumer electronics.

Who is Sunlord?

Established in 2000, Sunlord (SSE: 002138) is a technology developer for the passive component industry, working across multilayer chip inductor, wire wound chip inductor, common mode choke, varistor, NTC thermistor, LC filter, chip antenna, ASM, transformer and Tantalum Capacitors.

What are Sunlord products?

Sunlord's products focus on magnetic devices, microwave devices, sensitive devices, which are widely used in communications, consumer electronics, computers, automotive electronics, new energy, network equipments, industry electronics, and other fields.

Why should you choose Sunlord?

With its sound management system, strong development capability, high quality product quality, and comprehensive service, Sunlord has become a supplier of electronic components for many well-known domestic and international enterprises.

What is a Sunlord signal line?

These products are widely used for low-speed signal line, high-speed signal line, power line, audio line and differential lines, to meet the requirements of different application scenarios. Established in 2000, Sunlord (Stock Code: 002138)
