Are Longyearbyen and Svalbard facing an energy transition?

Top image: Longyearbyen and Svalbard are facing an energy transition. This is the background for the cooperation agreement between UNIS, Store Norske and SINTEF. Photo: Graham Gilbert/UNIS. Longyearbyen and Svalbard are facing a huge energy transition.

What is the difference between Svalbard and Jan Mayen?

Svalbard is an archipelago in the Arctic Ocean under the sovereignty of Norway, but is subject to the special status granted by the Svalbard Treaty. Jan Mayen is a remote island in the Arctic Ocean; it has no permanent population and is administered by the County Governor of Nordland.

What is a Svalbard & Jan Mayen islands?

The United Nations Statistics Division also uses this code, but has named it the Svalbard and Jan Mayen Islands. Svalbard is an archipelago in the Arctic Ocean under the sovereignty of Norway, but is subject to the special status granted by the Svalbard Treaty.

Who governs Svalbard?

The archipelago is administered by the Governor of Svalbard, which is subordinate to the Norwegian Ministry of Justice and Public Security. Unlike the rest of Norway (including Jan Mayen), Svalbard is a free economic zone and a demilitarized zone, and is not part of the Schengen Area nor the European Economic Area.

When did Svalbard become part of Norway?

The Svalbard Treaty of 1920 recognizes Norwegian sovereignty, and the 1925 Svalbard Act made Svalbard a full part of the Kingdom of Norway.

Will renewables revolutionise the geopolitics of power generation?

Renewables threaten to revolutionise the geopolitics of power generation, but until then, location is everything. Germany consumes the largest amount of power in Europe, with most of this coming from coal-fired plants. But as the country attempts to phase out more than 20GW of fossil fuels, how will it power its heavy industries?

Join us on a journey to two of the most unique and remote territories in the Arctic: Svalbard and Jan Mayen. In this episode of Nation Explorer, we'll explor...

Power grid codes. Before plans for the construction of pylons and transmission lines are approved, TSOs require generators to comply with stringent standards in order to ensure safe, secure and economic functioning of the electric system. "Meanwhile, in Germany, 150GW-hours of wind generated electricity was lost in 2010, an increase of up to 69 ...
