

Will ejecting Russian banks from Swift affect the economy?

None of this is to say that there will be no economic impact in ejecting Russian banks from Swift. It will affect lower value payments, such as those in small business supply chains, because Swift makes payments processing so cheap and easy.

Are swift messaging systems a critical part of international economic activity?

Yes, Swift messaging systems are a critical part of international economic activity. They provide extremely secure communications, developed over five decades, dovetailing with the many and varied operations of commercial banks in international transactions.

Will the EU sanction Russia through swift?

Getting the EU on board for sanctioning Russia through SWIFT had been a tough process since EU trade with Russia amounted to 80 billion euros, about 10 times as much as the United States, which had been an early proponent of such measures. Germany specifically had balked at the measure since it could hit them hard.
