

Does Qatar have solar energy?

The State of Qatar, a member of the Gulf Cooperation Council (GCC) is a country with high energy security due to the abundance of fossil fuel resources within its borders. However, its geographical location also avails the country of an abundance of solar radiation.

How can Qatar export energy?

The most optimal way to export the gas is by conversion to hydrogen. However, in a world increasingly threatened by climate change, rapid decarbonization of global energy systems is a priority, and it is imperative that Qatari policymakers delink the national economy from energy exports over the long term.

Can Qatar rely on natural gas indefinitely?

Although global demand for natural gas is growing as it plays an important role as a transition fuel in decarbonization strategies, Qatar cannot rely on its hydrocarbon industry indefinitely. As climate change mitigation efforts grow, the world will have to reduce its dependence on all hydrocarbon fuels.
