

What is Enegen Power Systems?

Enegen Power Systems is a leading U.K. based provider of scheduling, Wholesale and Balancing Mechanism dispatch, and commercial optimisation software. Their software works seamlessly with an adaptive portal platform to provide a complete optimisation, dispatch, and reporting system for the energy sector. Enegen Power Systems offers Power Purchase Agreement Automation Software (PPAFlow).

Does Thailand need a new national energy plan?

The IEA has provided recommendations to Thailand as input to their discussions on the drafting of a new national energy plan. The IEA examined the priorities for Thai power system decarbonisation, and how hybrid technologies can contribute and provide value to the system.

Can the Thai power system reduce its emissions?

Building upon the current PDP, this report analyses how the Thai power system can decrease its emissions to meet the targets by increasing the amount of wind and solar PV in its system, and how it can integrate these variable renewable energy sources efficiently.

Why is power system flexibility important in Thailand?

With the growing share of renewable energy and emerging technologies, establishing and maintaining adequate flexibility is an important part of Thailand's power system development and modernisation, and the country's clean energy transition. Power system flexibility is crucial for ensuring security of supply.

Does Thailand have an enhanced single-buyer system?

Thailand has an enhanced single-buyer system, which means that the vertically integrated utility buys power from both its own generation assets and from independent power producers. This study is conducted in the context of the enhanced single-buyer system, and identifies contractual flexibility within this scope.

Why does Thailand need more flexible electricity generation?

Thailand is also set to increase its share of renewables in electricity generation, which creates a need for more flexible generation from the thermal fleet to accommodate variable renewables. IEA. Licence: CC BY 4.0

Electricity is generated from 53 EGAT power plants countrywide. With a total installed capacity of 16,237.02 MW, EGAT power plants consist of 3 thermal power plants, 6 combined cycle power plants, 30 hydropower plants, 9 ...

Enegen Power Systems has experience in working with a range of modern collaboration tools; however the preference is to use Microsoft Team Foundation Server (TFS) internally to manage Sprints, and thereafter use Atlassian JIRA or Microsoft SharePoint for UAT, Change Requests and post Go-Live support. ...
