Demand for electricity in Togo has increased rapidly in line with economic growth, but energy production capacity remains insufficient to trigger structural transformation and private sector development. The progress made and the favourable outlook should help to achieve universal access to electricity, which the authorities have set for 2030.

Especially for countries traversed by the WAGP: Benin, Togo, and Ghana (underway)." A project of this kind was also announced in Togo in 2018, with Equatorial Guinea, a significant LNG producer. Diversifying energy sources is a viable solution, but it requires substantial investments in infrastructure, a process that could prove lengthy.

Energy Aspects" Energy 360 service is designed for professionals and executives with exposure to oil, gas and power prices and the broader energy landscape. With this service, you can efficiently track critical energy

market developments and easily analyse what they mean for your investment portfolio or business.

Explore THREE60 Energy's comprehensive service lines, offering integrated asset life cycle services including wells, operations, subsea, subsurface, and product solutions.
