

Turks and Caicos Islands farm building solar panels

Where can solar power be installed in Turks & Caicos?

Solar-derived power is increasing in popularity, with many private installations visible throughout the country, especially on new Turks and Caicos villa projects. Several local companies specialize in both supply and installation of alternative energy systems. The Fortis TCI electricity plant on Providenciales.

Can Turks and Caicos use solar power?

The Turks and Caicos Government and Fortis TCI are currently reviewing the electricity legislation to enable Turks and Caicos residents to use the solar power they produce to offset their power consumption (rather than sell everything back to Fortis at their pre-agreed rate).

Who produces electricity in Turks & Caicos?

In the Turks and Caicos, all public electricity generation is run by Fortis TCI, a vertically integrated company that provides both power generation and distribution.

Will Fortis TCI install a solar array in North Caicos?

Fortis TCI announced in 2017 that 1 MW of solar capacity is scheduled to be installed in the islands via the utility company, which would include a 700 kW array on North Caicos and 300 kW throughout the other islands. These projects are ongoing. There are two approaches for persons wishing to install a solar array at their residence or business:

What is the Electricity Standard in Turks and Caicos?

The electricity standard in the Turks and Caicos is 120v, 60Hz and U.S. style power plugs. Solar-derived power is increasing in popularity, with many private installations visible throughout the country, especially on new Turks and Caicos villa projects.

Who owns Fortis Turks & Caicos?

Fortis Turks and Caicos (FTCI), a subsidiary of Canadian utility holding company Fortis Inc., acquired P.P.C and AEP in 2006, and concluded an acquisition of TCU in 2012. Electricity is priced via two components: 'Electric' which includes generation and distribution, and 'Fuel Factor' which varies based on global fuel prices.

Solar panels are renowned for their low maintenance requirements, offering decades of service with minimal intervention. In the Turks and Caicos Islands and the Bahamas, where solar energy is increasingly popular, this aspect is particularly appealing to homeowners and businesses alike. Regular, simple care is all it takes to maintain their optimal performance.

Solar power systems can be used to power anything from as small as an LED light bulb, to as large as utility grade power production plants. The lifespan of a solar panel can be in excess of 30 years. The panels that we ...
