

Turks and Caicos Islands solar panels agriculture

How many rooftop solar PV systems will be installed in Turks & Caicos?

The contract outlines the installation of five rooftop solar PV systems, with battery energy storage and accessories at the following critical public facilities: These rooftop solar PV systems are specially designed for resilience to withstand fierce climatic conditions in the Turks and Caicos Islands.

Where can solar power be installed in Turks & Caicos?

Solar-derived power is increasing in popularity, with many private installations visible throughout the country, especially on new Turks and Caicos villa projects. Several local companies specialize in both supply and installation of alternative energy systems. The Fortis TCI electricity plant on Providenciales.

Can Turks and Caicos use solar power?

The Turks and Caicos Government and Fortis TCI are currently reviewing the electricity legislation to enable Turks and Caicos residents to use the solar power they produce to offset their power consumption (rather than sell everything back to Fortis at their pre-agreed rate).

What is transforming to green energy in the Turks and Caicos Islands?

The "Transitioning towards Green Energy in the Turks and Caicos Islands" project falls within the development activities of the RESEMBID programme, which is a 47-project programme funded by the European Union and implemented by Expertise France - the development cooperation agency of the Government of France.

Who produces electricity in Turks & Caicos?

In the Turks and Caicos, all public electricity generation is run by Fortis TCI, a vertically integrated company that provides both power generation and distribution.

Does Turks and Caicos have a policy on energy efficiency?

Turks and Caicos has few policies related to energy efficiency and renewable energy. Historically, the territory has not implemented policy mechanisms to aid in the development of clean and energy-efficient technologies.
