

What was the energy grid like in Uruguay?

Uruguay's energy grid was powered almost exclusively by domestically created, renewable energy, and, adjusted for inflation, consumer prices had gone down. Today, there are more than 700 wind turbines installed across Uruguay's countryside. "It was absolutely a complete transformation," says Méndez Galain.

Does Uruguay have good conditions for green hydrogen & derivatives?

After a process of analysis and exchange with relevant actors at national and international level, it is concluded that Uruguay has very good conditions for the development of green hydrogen and derivatives. This is due to its large amount of renewable energy sources and biogenic CO₂, as well as its institutional stability and strong democracy.

What are the different types of energy sources in Uruguay?

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. Uruguay: How much of the country's energy comes from nuclear power?

What is Uruguay's energy future?

His vision for Uruguay's energy future was to cover that empty land with hundreds of wind turbines. Today, wind power accounts for around 40% of Uruguay's energy production. And, according to a 2008 law, all the wind in the country officially belongs to the Uruguayan people.

Does Uruguay have a wind power auction?

In 2009, Uruguay started holding auctions in which different wind companies from around the world came to bid on how cheaply they'd sell renewable energy to the country. In 2011, Uruguay held an auction intended to secure 150 megawatts of new wind power, which would have represented about 5% of the country's energy generating capacity.

Is Uruguay a repeatable framework of energy sovereignty for developing countries?

Ramón Méndez Galain believes so. Uruguay's former national director of energy in the Ministry of Industry, Energy and Mining, who was the impetus for the country's shift away from dirty fuels, has been promoting the country's success as a repeatable framework of energy sovereignty for developing countries.

Situated in the city of Fray Bentos, Kahiros will be a system consisting of a 2-MW electrolyser, which powered by a 4.8-MW solar farm, will churn out 36 kg of green hydrogen ...
