

Vacheron constantin s new energy storage equipment outdoors

What is Vacheron Constantin?

Vacheron Constantin is a rich tradition watchmaker currently producing watches and whose pre-owned watches are perfect for any watch collector. They have created an uncountable number of watches over time.

Is Vacheron Constantin the most complicated mechanical wristwatch ever made?

Swiss watchmaker Vacheron Constantin's latest timepiece is not just packed with novel features -- it is, officially, the most complicated mechanical wristwatch ever produced. In horology, a "complication" refers to any function that goes beyond standard time-telling, such as a Gregorian calendar or moon phase display.

Is Vacheron Constantin 'la première' for sale?

But it is, indeed, for sale. It is called "La Première" because it is the first, and in that sense, it is one-of-a-kind, but Vacheron Constantin will reuse the movement to create other pieces in different metals, colors, and aesthetics. But only the rarefied few will get their hands on one and you'll likely never see one on the wrist.

Vacheron constantin s new energy storage equipment outdoors

It's that creative way of thinking that led Vacheron Constantin to create the first-ever driving watch. Originally produced for the American market, it was revived as the Historiques American 1921 in 2008. Even now it is a beautifully unusual design with its crown proud of the case, perched on a corner between what is traditionally the one and two o'clock position but ...
