

What is Vanguard renewables?

Every day, the Vanguard Renewables team sets out on a mission to change the way the world views waste and how each of us powers our lives. Become a part of the change. We believe that organic waste is an unrealized resource. At Vanguard Renewables, we regenerate waste to its highest and best available use.

When did the Republic of the Congo start exporting LNG?

After years of either declining or stable domestic natural gas production, the Republic of the Congo began exporting LNG for the first time when the first phase of a two-phase FLNG project began operating in February 2024.

How much natural gas did Congo Brazzaville produce in 2022?

According to the World Bank Group, Congo Brazzaville flared about 64 Bft 3 of natural gas in 2022, more than four times its domestic natural gas production in 2022. In 2024, the Italian energy company Eni, the project operator, completed the first phase of Congo Brazzaville's first LNG export project.

What is Congo Brazzaville's first LNG export project?

In 2024, the Italian energy company Eni, the project operator, completed the first phase of Congo Brazzaville's first LNG export project. The Tango FLNG facility exported its first LNG cargo at the end of February 2024, which Eni announced on February 27. The Tango FLNG facility has a production capacity of 29 Bft 3 /yr.
