

Is Eswatini a sustainable country?

A nation that has long relied on neighboring South Africa and Mozambique for unsustainable fossil fuel-based electricity imports, renewable energy in Eswatini is quickly diversifying. The transformative journey culminated at the COP26 conference, where Eswatini committed to an ambitious 50% surge in renewable energy production by 2030.

What is the main energy source in Eswatini?

Hydroelectric power currently stands as one of the most prominent energy sources in Eswatini. The EEC operates four hydropower plants, constituting 15% of the country's electricity production and plans to bolster the existing infrastructure.

What is Eswatini's energy revolution?

Eswatini's energy revolution is a testament to its dedication to sustainability and self-sufficiency. As Eswatini strides into the future with renewable energy, the convergence of local innovation, international collaboration and growth-oriented policies promises to illuminate every corner of the nation.

What does Eswatini's COP26 pledge mean for Swazi energy?

The transformative journey culminated at the COP26 conference, where Eswatini committed to an ambitious 50% surge in renewable energy production by 2030. This pledge signifies a crucial step toward Swazi energy independence, bridging the stark urban-rural economic divide and promising new employment and educational opportunities.

Why is hydroelectric power important in Eswatini?

Projects such as these conserve millions of liters of fuel throughout their lifetime and ensure year-round reliable and sustainable electrification for public facilities. Hydroelectric power currently stands as one of the most prominent energy sources in Eswatini.

Can a wind turbine be installed in Eswatini?

While wind energy production in Eswatini is negligible, the country's mountainous regions hold immense potential for installing wind turbines. Government feasibility studies in the Lubombo Plateau, a largely uninhabited and undeveloped region near the border with Mozambique, are ongoing.

Vortex Energy is a leading energy transition investment manager and has managed EUR 1.6 billion in AUMs to date, of which EUR 1.3 billion have been divested. Founded in 2014, our global, multi-disciplinary investment strategy has seen us complete the full cycle of acquisition and divested 0.8GW, and currently developing 7.0GW in clean energy assets in Europe and the ...

By: Koketso Lediga, Managing Director & Lead Consultant, Infra-Afrika Advisory, Sandton. After a long wait, the Kingdom of Eswatini issued a request for the qualification and development of a 40MW solar PV

plant to be developed via the First Tranche Procurement Programme and a 40MW biomass-to-energy plant to be developed via the Second Tranche ...

The Ignis management team looks forward to working with Vortex Energy in this next stage of growth and transformation." Karim Moussa, CEO of Vortex Energy: "Ignis has an extraordinary team, with a visionary plan to create an international renewable IPP in the coming years. Vortex Energy will support Ignis to achieve its objectives and work ...

Eswatini, formerly known as Swaziland, is a small, landlocked country in Southern Africa. Most of the population consists of ethnic Swazis, who established their kingdom in the mid-18th century. The kingdom was governed ...

A vortex tube reduces the pressure of pressurized gas. During the gas pressure reduction process, released gas undergoes energy and mass segregation (vortex phenomenon), forming a "cold" and "hot" flow that can be repurposed in various industrial uses. No external energy sources are needed or consumed to generate the

cooling and heating.

Vortex Energy is becoming part of the Vitol Group, gaining a partner with which it will accelerate its growth, scale of operations and the process of supporting the Polish energy transition. Vortex Energy Polska sp. z o.o. Aleja Wojska Polskiego 68 70-479 Szczecin NIP 3020001493 KRS 0000456208 Sąd Rejonowy Szczecin-Centrum w Szczecinie ...
