

What items can be stored in a storage unit?

Patio furniture: These pieces are designed to weather the elements and will thrive in a storage unit. Hardware: Tools, lumber, and PVC can handle the variances of temperature in a non-climate-controlled storage unit. Curtains and drapes: Just make sure they're clean and dry before stowing.

What are the different types of storage?

Whatever the reason, you'll be glad to know that your options for stashing your belongings are greater than you might have imagined. Here are four types of storage to consider, and the pros, cons, and costs of each. The most obvious option is self-storage--aka the storage unit. It's a secure, flexible, and generally affordable choice.

What items should be kept in a hot storage unit?

Furniture: Antiques, wood, leather -- really anything that's sensitive or can warp easily needs to be included. Paper: Art, photos, and important documents are not going to fare well in humidity. Electronics: Rusted connections and melting plastic await you if these things are kept in a hot storage unit.

Are there different types of houses?

While there are countless styles of houses available, here we are focusing on types of houses rather than styles of houses. The type of home refers to the actual structure of the building, its purpose, and sometimes its history. House style, by comparison, would consider the architectural design of the building.

How long can you safely store items in a standard self storage unit?

If you're only storing items for a short period of time, then you should be okay with a standard self storage unit. As for times when you're probably safe to skip the climate controlled storage unit, if you're not storing any items from the provided list and you're only storing items for a month or less in outdoor storage, and three months or less in indoor storage, then you should be okay with a standard self storage unit.

When should you consider using a storage unit?

You should consider using a storage unit when storing items in an area with extreme heat, cold, or humidity. This is because moisture build up, extreme temperatures, and pests are common concerns that can damage your belongings while in storage.
