

How does Zambia support solar?

The country is currently supporting solar through the Scaling Solar program and the Zambian REFiT Strategy, an initiative developed with the support of German development bank KfW. The Zambian government is aiming to deploy 500 MW of solar PV by 2023, in order to further reduce the country's chronic power shortages.

Why should German and European service providers invest in Zambia?

For German and European service providers active in the energy sector, Zambia presents significant potential for business development. There are clear needs across the solar energy and storage value chain, including project development and financing, equipment manufacturing, system integration and contracting.

How much solar power does Zambia have?

According to the International Renewable Energy Agency, Zambia had 96 MW of installed solar power at the end of 2019 and around 95 MW were deployed in that year alone. The country is currently supporting solar through the Scaling Solar program and the Zambian REFiT Strategy, an initiative developed with the support of German development bank KfW.

Can battery storage be used with solar photovoltaics in Zambia?

The Zambian regulation foresees customs duty and VAT exemptions for most equipment used in renewable energy or battery storage projects. Detailed information is provided in In this section, we discuss the opportunity of battery storage in combination with solar photovoltaics from a financial point of view.

What companies trade in electricity in Zambia?

Private companies also trade in electricity in Zambia. The largest of these, Copperbelt Energy Corporation Plc (CEC), buys electricity primarily from ZESCO and sells it to the various mines in the Copperbelt Province. It also operates its own generators, most of which run on fossil fuels.

How much does a solar battery cost in Zambia?

Africa Clean Energy Technical Assistance Facility. (2022). Customs Handbook for Solar PV Products in Zambia. Bloomberg New Energy Finance. (2022, December 6). Lithium-ion Battery Pack Prices Rise for First Time to an Average of \$151/kWh.
